John, as you know, I was really worried about the Kentucky Street waterline replacement project. Since all of our students come and go from school in automobiles, I worried that we would cause a horrible traffic problem when Kentucky Street was reduced to one lane.

Many thanks to Scott Fewins for frequent meetings and updates on the progress of the project. He and Branden Boyd from RD Construction were very helpful and I think we kept traffic moving. They were sensitive to our arrival and pick-up schedule and helped get parents in and out of the school. I am very appreciate of Scott's help.
