

11/06/2020

Dear City of Lawrence team,

[LMH Health reported today](#) that "The number of active COVID-19 cases is increasing across the county, and we are seeing a higher level of COVID-19 positive hospitalizations recently. Please, redouble your efforts to spread out, keep your circle of contacts small, and wear your mask."

And, in their [daily report](#) today, Lawrence Douglas County Public Health says, "The higher number of cases in the state and now in our community is a reminder for people to redouble their efforts about mask wearing, spreading out and keeping your circle of contacts small."

I know we're all "COVID fatigued" but from now going forward, it's more important than ever to stay vigilant to stay safe and keep others safe.

Please keep up the good work and wear your mask, social distance and wash/sanitize your hands often.

Thank you,
Shelby Patch
Office of Risk Management
