

RAIN BARREL CONSTRUCTION WORKSHOPS GIVEN BY WASTE REDUCTION AND RECYCLING STAFF

In an effort to increase water conservation and reduce the peak volume and velocity of stormwater runoff from the home landscape — Waste Reduction and Recycling staff have organized a series of workshops for citizens who are interested in constructing their own Rain Barrels to capture rain runoff from their roofs for use in their gardens or lawns.

Future Workshops and rain barrel information may be found at: www.LawrenceRecycles.org

Diana Sjogren (far right), WRR Specialist, helped this group construct their own rain Barrels.
