Dear Mr. Woosley,

I live on 21st and Tennessee street and have for the last 20 odd years. There are at least 2 accidents and usually 5 or 6 during any given year. Most of the accidents occur when the car on 21st is going east and the other automobile is going north.

The reason for this is that parking is allowed on the west side of the street on Tennessee and because there are so many SUVs and trucks it is often hard to see if another car is coming. Most people stop for a quick look and then head right into the intersection and the car coming north. Gray, tan, and other light colored cars just add to the problem. Tennessee is a narrow street and the west side of the street is the only place allowed for parking. It is a problem when you have more than one vehicle or friends are visiting to find a close place to park. So, I have no wonderful solution to offer but I am concerned at the number of accidents and wonder if it would be possible for you to at least look into the matter.

Thank you for your time and consideration to this matter.

Sincerely,  
Susan Peterson
