Subject: parking causing safety problems

Wisconsin Street between 6th and 7th:

Custom Highline parks their employees and some of their cars for sale on BOTH sides of the street. This cause's only ONE lane on the street almost all the way up the block during some times of the day. This causes those of us that live here to have to back all the way up the street to let in traffic coming, un-stoppable, off of 6th St. Please don't wait for there to be an accident; can it be just parking on one side of the road?
