RE: Greenbrier Addition Sanitary Sewer Variance Request

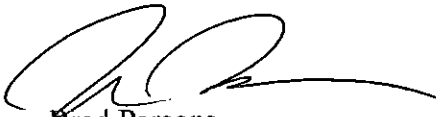

Mr. Ciesielski:

I have been advised that I need additional variances to Section 19-214, Section B of the City Code. Specifically, I request that the sanitary sewer main not be required to cross Greenbrier Drive perpendicular to the street and that the house service be permitted to extend in the right of way beyond 15'. Again, these requests are due to the fact that the work is in an existing neighborhood, and that to comply with these requirements would be additionally disruptive, would require the removal of a neighbor's driveway, and would require an additional manhole in a neighbor's yard some 40' from an existing sewer manhole. Numerous street crossings by the sewer line not perpendicular to the roadway exist in this neighborhood.

Thank you for your consideration.

Sincerely,

  
Bo Newsom
