Subject: No parking request

I am requesting no parking signs be placed along the south side of University Drive from Crestline eastward until the road ends. I represent the owners of the property on the south side of the street where the no parking signs would be located. I also represent the owners of several properties along the north side of the street as well. Currently vehicles are parking along both sides of the street and this makes it difficult to travel. With cars along both sides of this street, I am unsure if it is wide enough for fire trucks to get through. Designating the south side of this street as a no parking area would help improve traffic flow and potentially fire safety. Thank you for your consideration.
