# City of Lawrence Traffic Safety Commission Agenda March 2, 2008-7:00 PM City Commission Room, City Hall

MEMBERS: Richard Heckler, Chair; Jim Woods, Vice-Chair; Robert Hagen; Scott Criqui, Dan Harden; Ken Miller; Jason Novotny; Robin Smith; and John Ziegelmeyer Jr.

# Anyone who wishes to be notified when their item will be heard by the City Commission must provide their name and a telephone number or an e-mail address.

- ITEM NO. 1: Review and approve the minutes of the Traffic Safety Commission meeting, February 2, 2009.
- ITEM NO. 2: Consider request for TRAFFIC CALMING on Ousdahl Road between 25<sup>th</sup> Street & 26<sup>th</sup> Street.

Report:

- 1. Ousdahl Road is classified as a "local" street in this residential area with a speed limit of 30mph as established by state law.
- 2. The city's Traffic Calming Policy permits traffic calming on local streets if the 85<sup>th</sup> percentile speed of traffic is 5mph or greater over the speed limit or if 24-hour two-way volume is greater than 1000.
- 3. A traffic study conducted on February 4-5, 2009 found the 85<sup>th</sup> percentile speed of traffic to range from 33.4mph to 39.1mph with an average of 37.2mph and a 24-hour two-way volume of approximately 1350.
- 4. Therefore, this portion of Ousdahl Road meets the minimum requirements for consideration of traffic calming devices.

# ACTION: Provide recommendation to the City Commission.

ITEM NO. 3: Consider request to establish NO PARKING along the south side of Greever Terrace between Carolina Street & Louisiana Street.

Report:

- 1. Greever Terrace is a "local" street in a residential area paved 25 feet wide.
- 2. Parking is currently prohibited along the south side of Greever Terrace between Carolina Street & Virginia Street.
- 3. Parking is currently prohibited 7AM-5PM MON-FRI along the north side of Greever Terrace from Louisiana Street west 261 feet.
- 4. Parking is currently RESERVED FOR PERSONS WITH DISABILITIES along the south side of Greever Terrace from 60 feet west of Louisiana Street to 117 feet west of Louisiana Street.
- 5. City practice has been to not restrict parking in residential areas unless supported by property owners or residents affected by the restriction.

# ACTION: Provide recommendation to the City Commission.

ITEM NO. 4: Consider request to mark PEDESTRIAN CROSSWALKS across Connecticut Street at 9<sup>th</sup> Street and at 11<sup>th</sup> Street.

# Report:

- 1. Crosswalk markings provide guidance for pedestrians who are crossing roadways by defining and delineating paths on approaches to intersections where traffic stops.
- 2. The *Manual on Uniform Traffic Control Devices* does not provide warrants for installation of crosswalk markings.
- 3. The City of Lawrence does not have a written policy on the installation of crosswalk markings; however, the practice has been to install the markings at all signalized intersections where pedestrian signals are provided and at all roundabouts. These markings are generally permanent markings (not paint) and are rolled into hot asphalt or glued to concrete at the time of the roadway construction.

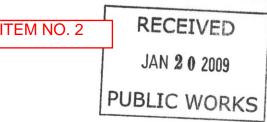

- 4. There is no indication from city records that crosswalks have ever been marked at 11<sup>th</sup> & Connecticut. Records do show that school crosswalks were provided at 9<sup>th</sup> & Connecticut until the mid 1990's when the number of students crossing no longer warranted the markings.
- 5. In 2006, this commission recommended that STOP LINES be installed at 9<sup>th</sup> & Connecticut in order to encourage vehicles to stop in advance of the unmarked crosswalk. These markings are still in place (see attached photographs).
- 6. It should be noted that crosswalk markings are very high maintenance, particularly at intersections where vehicles are turning and during the winter when sand is on the street and the city's budget for this type of maintenance is limited.

# ACTION: Provide recommendation to the City Commission.

- ITEM NO. 5: Public Comment.
- ITEM NO. 6: Commission Items.
- ITEM NO. 7: Miscellaneous.

City Commission action on previous recommendations:

None.

January 14, 2009

Douglas Trout 2556 Ousdahl Road Lawrence, Kansas 66046 (785) 312-9288

City of Lawrence Traffic Engineering

I am requesting a traffic study of Ousdahl between 25<sup>th</sup> Street and 26<sup>th</sup> Street. Over the past few years traffic has increased through this residential area, and my own observations indicate drivers are using this South Hills area to avoid the traffic control lights at 23<sup>rd</sup> Street and Iowa. This traffic has increased even more in the past year, and I believe the increase is through traffic, not local residents.

Ousdahl in this section is "three" lane, two traffic lanes north south and a parking lane on the west side. Many people have trouble negotiating this hill and curve with cars parked on the west side. Drivers traveling south tend to swing out to the east as they go down the hill. Also, it seems, some drivers are challenged by the Grand Prix-like terrain and increase their speed in either direction. There is a mix of passenger and commercial vehicles.

I am speculating, but I do believe that the fatal accident of November 19, 2008 would have been avoided or had a less tragic outcome if there had been traffic calming devices on Ousdahl north and south of the 25<sup>th</sup> Street Court turn. This area has become more dangerous for local traffic and pedestrians as well. There are no sidewalks so pedestrians do walk in the street, some with baby strollers and small children.

I noticed an area on 8<sup>th</sup> Street between Lawrence Avenue and Kasold Drive very similar to what I described above. Traffic calming devices were placed on the hills east and west, which does slow traffic effectively.

Again, please, study this area with the goal in mind of traffic calming devices and possibly reducing the speed limit, which will regulate the increased flow of through traffic in our residential neighborhood.

Sincerely,

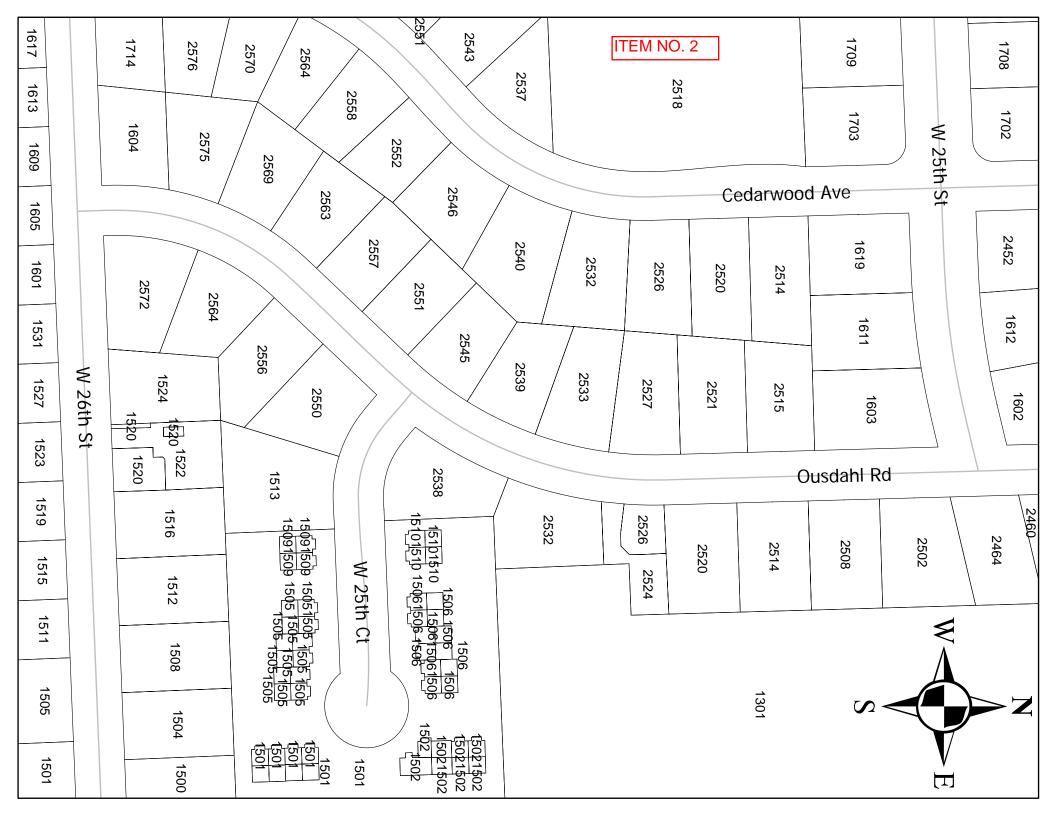

Dangles & Trout

# TRAFFIC CALMING POLICY

Resolution No. 6602, August 23, 2005

- 1. TRAFFIC-CALMING DEVICES may include but are not limited to Traffic-Calming Circles, Speed Humps and Speed Cushions, Speed Tables, Partial Diverters, Full Diverters, Center Island Narrowing, Chokers, and Road Closures; however, roundabouts are traffic management devices and are not subject to this policy.
- 2. TRAFFIC-CALMING DEVICES may be permitted on "local" streets as designated by the City's Major Thoroughfares Map, and under any one of the following conditions:
  - A. The 85<sup>th</sup> percentile speed of traffic is 5 mph or greater over the speed limit, or
  - B. The 24-hour two-way traffic volume is greater than 1000, or
  - C. Cut-through traffic comprises more than 50% of the traffic during the peak hour of the day, or
  - D. Where no single condition is satisfied, but where any two of A, B or C above are satisfied to the extent of 80 percent or more of the stated values.
- 3. TRAFFIC-CALMING DEVICES (except SPEED HUMPS) may be permitted on "collector" streets as designated by the City's Major Thoroughfares Map, under any one of the following conditions:
  - A. The 85<sup>th</sup> percentile speed of traffic is 5 mph or greater over the speed limit, or
  - B. The 24-hour two-way traffic volume is greater than 3000, or
  - C. Cut-through traffic comprises more than 50% of the traffic during the peak hour of the day, or
  - D. More than 50% of the frontage of the roadway consists of residential lots with the houses facing the roadway in question, or
  - E. Where no single condition is satisfied, but where any two of A, B, C or D above are satisfied to the extent of 80 percent or more of the stated values.
- 4. Traffic data will be collected with city personnel using city equipment only. In the event that a requested location does not meet the minimum requirements as stated in 2 or 3 above, subsequent requests will not be considered for a minimum of one year.
- 5. The Lawrence-Douglas County Fire & Medical Department, the Police Department, the Public Works Department and the Traffic Safety Commission must review all requests for TRAFFIC-CALMING DEVICES before being presented to the City Commission.
- 6. If a project is approved by the City Commission, the City Commission will determine financing of the construction. The City Commission may require 0-100% of the costs to be paid by the group or neighborhood making the request.
- 7. After a project is approved and funded by the City Commission, TRAFFIC-CALMING DEVICES will only be constructed at a location if 70% or more of the property owners within 300 feet measured along the centerline of the street in each direction approve of the installation or if directed by the City Commission. The individual, group or neighborhood making the request shall be responsible for obtaining the property owners' and residents' approval in writing and submitting it to the city.
- 8. Once installed, TRAFFIC-CALMING DEVICES may only be removed at a location if more than 70% of the property owners and residents within 300 feet measured along the centerline of the street in each direction approve of the removal or if directed by the City Commission. The individual, group or neighborhood making the request shall be responsible for obtaining the property owners' and residents' approval in writing and submitting it to the city.
- 9. TRAFFIC CALMING DEVICES may initially be landscaped (if appropriate) by the city, provided that the group or neighborhood making the request agrees in writing to maintain the landscaping or pursuant to the payment of a landscape maintenance fee. No privately installed landscaping is permitted unless approved by the city in writing.

Subject: Parking on Greever Terrace

David

My name is Craig Jacob, 843 West 22nd St. Several of us in the Centennial neighborhood are concerned with the parking on Greever, particularly during school hours and when the new athletic fields are completed. There is a desire to have **NO Parking** <u>at least</u> on the south side of the street. What steps do we need to complete in order for this to occur? I have noticed that some recommendations go to the Traffic and Safety Commission. Any help in getting this done will be greatly appreciated. *Thank you!* Day: cell phone 764.6774 or 842.5265 (home evenings)

Subject: Pedestrian Crossings of Connecticut at 9th and 11th

#### David,

It was my understanding at the December 1<sup>st</sup>, 2008 Traffic Safety Commission meeting that city staff was directed to improve the crossings of Connecticut Street at 9<sup>th</sup> and 11<sup>th</sup> Streets with pedestrian crossing zones and stop bars marked on the pavement. Officially the action taken at that meeting was to deny the request because it was for school crossings rather than pedestrian crossings. The discussion at the meeting made it very clear to me and my neighborhood constituents present at the meeting that the Commission directed city staff to make the necessary changes to the intersections. It is now my understanding per my e-mail and telephone correspondence with you that somehow the official outcome of that meeting resulted in no action to be taken. It is somewhat confounding to me that after leaving that meeting with a clear impression that we were to get the desired pedestrian safety enhancements that we have to go through the process again. This is a small price to pay though for what I think will greatly enhance the safety and walk-ability of my neighborhood.

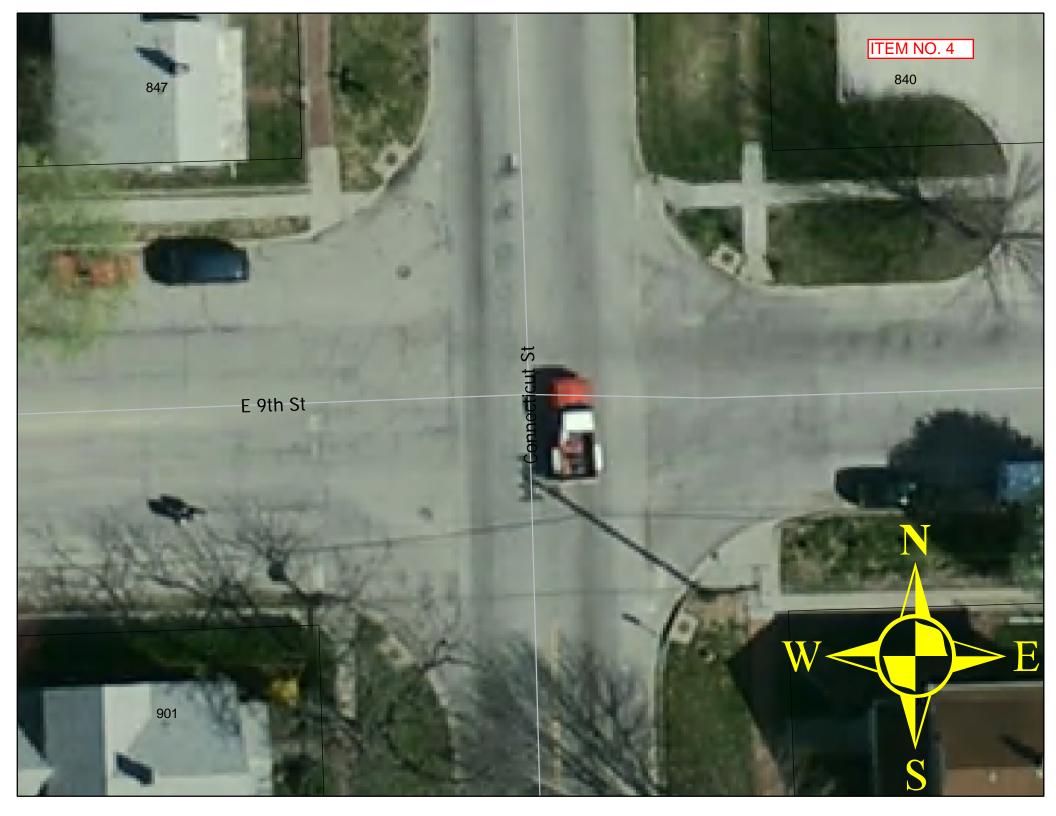

I hereby officially request that pedestrian pavement crossing marks and stop bars be placed on the street at the crossings of Connecticut Street at 9<sup>th</sup> and 11<sup>th</sup> Streets. The reasons for this request are as follows.

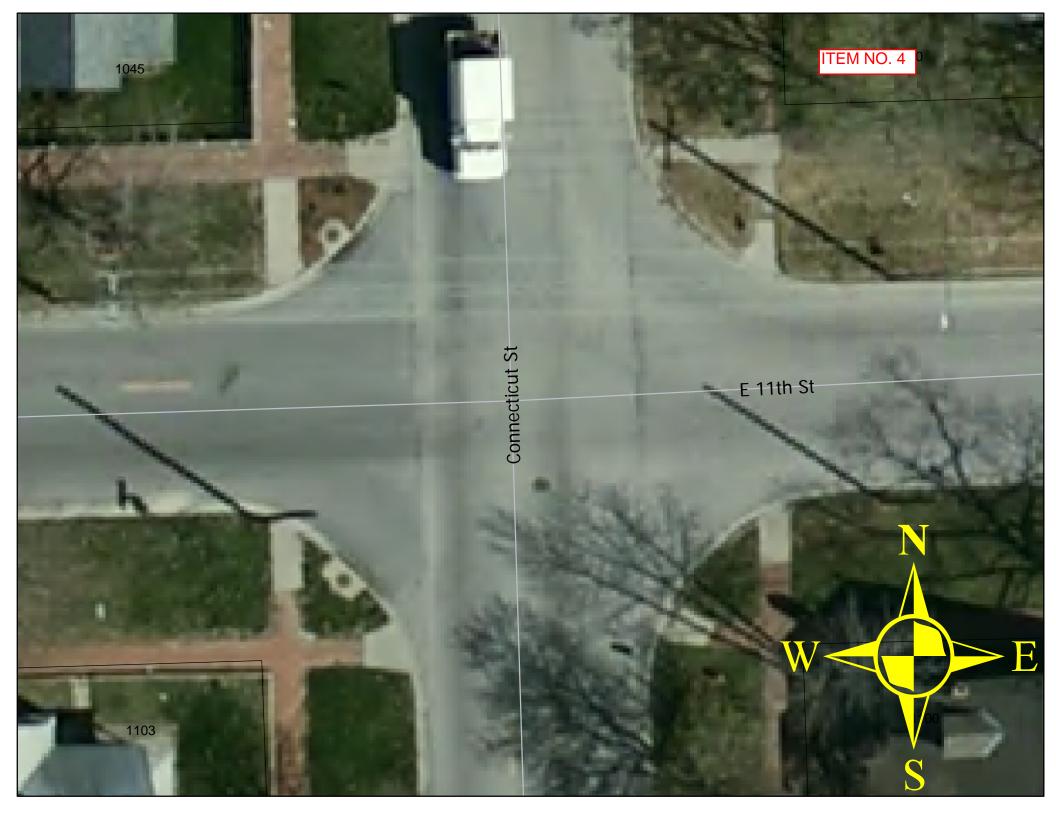

- There are currently no properly marked crosswalks on Connecticut between 15<sup>th</sup> Street and 7<sup>th</sup> Street
- There is a significant population of pedestrians east of Connecticut who routinely cross Connecticut to travel to the downtown areas to work, eat, shop, play, catch bus rides etc...
- The KDOT traffic count is around 9,000 vehicles per day on Connecticut (only 5k less than Mass Street)
- In numerous places around other parts of the city there are very nice, marked, and safe crosswalks in areas with substantially smaller traffic counts.
- There are approximately 17 New York Elementary students who live west of Connecticut without a planned, safe crossing route to New York School, east of Connecticut.
- 11<sup>th</sup> Street and 9<sup>th</sup> Street are ideal places for these crossings to occur as they are both existing 4-way stops, and they are ideally located to serve the largest population of East Lawrence residents and potential downtown and East Lawrence destinations.
- Historically the 9<sup>th</sup> Street intersection had a school crossing but at some point it was removed or allowed to deteriorate.

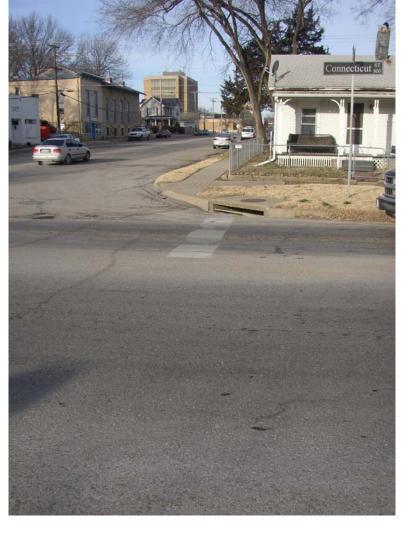

Please schedule this issue for review before the Traffic Safety Commission and please keep me informed as to the scheduled hearing date.

Thank you,

Mike Myers, NYS Parent, East Lawrence Resident 1312 New Hampshire

City of Lawrence Traffic Safety Commission March 2, 2009 Minutes

MEMBERS PRESENT: Jim Woods, Vice-Chair; Scott Criqui; Robert Hagen; Dan Harden; Ken Miller; Jason Novotny; and Robin Smith.

MEMBERS ABSENT: Richard Heckler, Chair; and John Ziegelmeyer Jr

STAFF PRESENT: David Woosley, Public Works Department

Vice-Chair Jim Woods called the meeting to order at 7:00 p.m. in the City Commission Room, City Hall, 6 E. 6th Street.

### **ITEM NO. 1:**

Review and approve the minutes of the Traffic Safety Commission meeting, February 2, 2009.

# MOTION BY COMMISSIONER HARDEN, SECONDED BY COMMISSIONER SMITH, TO APPROVE THE MINUTES OF THE TRAFFIC SAFETY COMMISSION MEETING, FEBRUARY 2, 2009; THE MOTION CARRIED 7-0.

### **ITEM NO. 2:**

# Consider request for TRAFFIC CALMING on Ousdahl Road between 25<sup>th</sup> Street & 26<sup>th</sup> Street.

David Woosley presented the information provided in the staff report.

Public comment:

Douglas Trout, 2556 Ousdahl Road: I think the studies show that the amount of traffic on Ousdahl between 25<sup>th</sup> and 26<sup>th</sup> exceeds what we would call local traffic;

it is being used as a cut-through from 23<sup>rd</sup> and traffic avoiding the intersection of 23<sup>rd</sup> & Iowa; it also shows that the speeds exceed what are reasonable and prudent; I'd like to mention the terrain of the street, it starts-out at 25<sup>th</sup>, rises to a peak, then drops-down rather quickly to a right-hand turn, rises again to a left-hand turn and doesn't straighten-out until it reaches a T-intersection at 26<sup>th</sup>; in addition, there are no sidewalks in the area; pedestrians use the east side of the street in both directions, quite often with children and strollers; it's a hazard to have that much traffic going at that speed; I'd really like you to be in favor of traffic dampening; I know it's an inconvenience, but in this case I think safety out-weighs the inconvenience.

Jodine Trout, 2556 Ousdahl Road: Last Thanksgiving on Saturday night we had a group of kids in a car come over the hill and miss the turn and crash into a tree; the driver was killed, two kids were life-flighted and another was lifeflighted after being transported to LMH; it's just real dangerous and that night there wasn't any ice and it wasn't wet.

Steve Davids, 2564 Ousdahl Road: I want to echo what Doug said; there is a lot of traffic there, a lot of people cutting-through there just using it to avoid the intersection at 23<sup>rd</sup> & Iowa; I'd like to see that cut-down and I think speed bumps would be a good way to do that; sometimes you have a hard time backing-out of your driveway and you get honked-at.

Irene Walker, 2572 Ousdahl Road: We have problems backing-out of our driveway; we also have problems with people coming down 26<sup>th</sup> Street and making a left-turn and drive into our yard a lot.

Commissioner Smith asked where the traffic counters were placed; Woosley advised one set was placed between  $25^{th}$  Street &  $25^{th}$  Court and the other was placed between  $25^{th}$  Court &  $26^{th}$  Street.

Commission Harden asked if this location meets the city's criteria; Woosley advised that it does; both for the speed of the traffic and the volume of traffic.

# MOTION BY COMMISSIONER HARDEN, SECONDED BY COMMISSIONER HAGEN, TO RECOMMEND TRAFFIC CALMING ON OUSDAHL ROAD BETWEEN 25<sup>TH</sup> STREET & 26<sup>TH</sup> STREET; THE MOTION CARRIED 7-0.

# **ITEM NO. 3:**

# **Consider request to establish NO PARKING along the south side of Greever Terrace between Carolina Street & Louisiana Street.**

David Woosley presented the information provided in the staff report.

Craig Jacob distributed a hand-out consisting of a petition, a sketch and numerous pictures.

Public comment:

Craig Jacob, 843 W. 22<sup>nd</sup> Street: I'm serving as a spokesman for our neighborhood association; we talked about this at our last meeting and I was willing to take this on and see what we could get done; we are requesting that the area in "red" on my sketch become "no parking"; we don't feel like a fire-truck or ambulance would be able to get through the area with cars parked on both sides and that is our major concern; some residents even have trouble getting out of their driveways; however, we are not asking for the cut-out area next to the school.

Tom Buller, 813 Greever Terrace: There is "no parking" in front of my house, but I have to drive down that road everyday to get out and it becomes pretty treacherous when you get two lines of cars there and people getting in-and-out of cars; it is a safety concern; sometimes people find the signs confusing.

Jeanne Klein, 824 Greever Terrace: I want to second what has been said; when you get two Explorers parked on either side it gets even skinner to get through and the school kids are not the best parallel-parkers; my main concern is whether or not you could get emergency vehicles through; we would really appreciate your consideration.

Commissioner Woods asked why there was "No Parking Mon-Fri 7am-5pm" on the north side; Woosley advised that it had probably been requested by the adjacent residents.

Commissioner Hagen: It seems reasonable to me.

# MOTION BY COMMISSIONER HAGEN, SECONDED BY COMMISSIONER MILLER, TO RECOMMEND THAT NO PARKING BE ESTABLISHED ALONG THE SOUTH SIDE OF GREEVER TERRACE BETWEEN VIRGINIA STREET & LOUISIANA STREET EXCEPT IN THE RECESSED AREA; THE MOTION CARRIED 7-0.

# ITEM NO. 4:

# Consider request to mark PEDESTRIAN CROSSWALKS across Connecticut Street at 9<sup>th</sup> Street and at 11<sup>th</sup> Street.

This item was removed from the agenda.

# **ITEM NO. 5:**

# **Public Comment:**

Craig Jacob, 843 W. 22<sup>nd</sup> Street: Last fall in a three-week period I saw five people eastbound try to turn left off 6<sup>th</sup> Street onto Vermont Street which is the southbound one-way bridge across the river; I think the traffic light should have a straight-arrow so you know you can't make a left-turn and I think arrows on the street would help.

# **ITEM NO. 6:**

# **Commission Items:**

None.

# **ITEM NO. 7:**

### **Miscellaneous:**

None.

The meeting adjourned at 7:35 P.M. The next scheduled meeting is Monday, April 6, 2009.

Respectfully submitted,

ITEM NO. 3

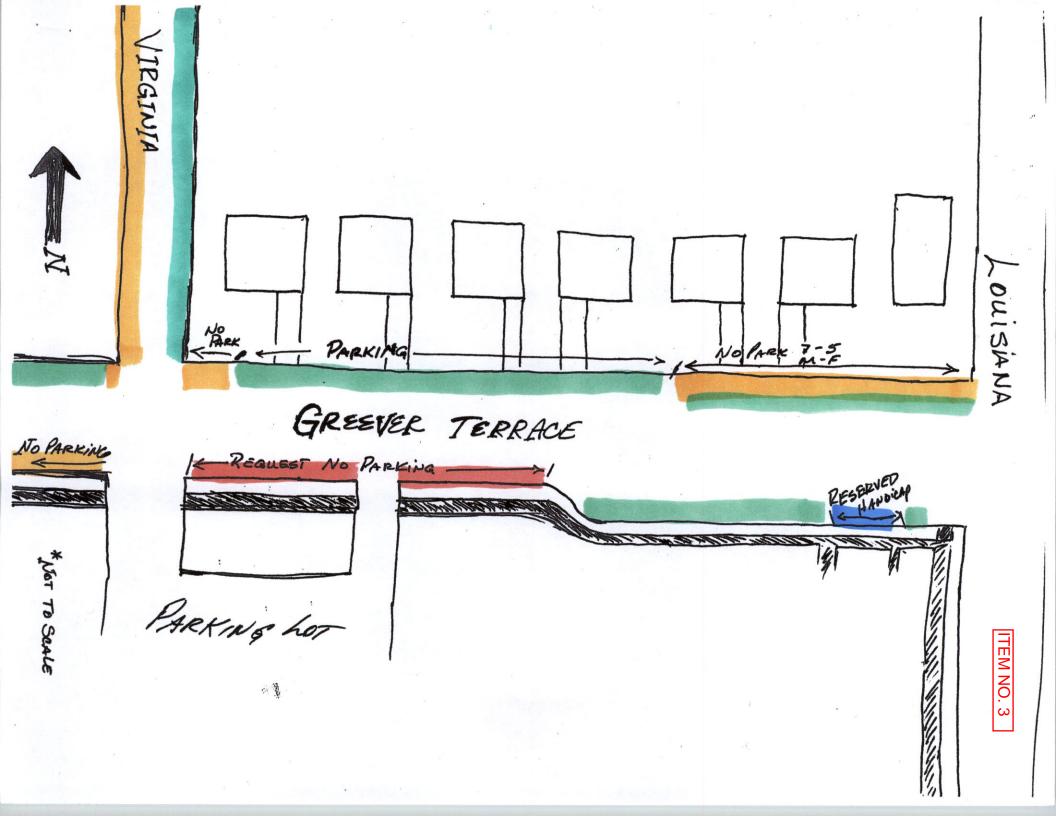

Traffic and Safety Committee City of Lawrence, Kansas

To Whom it May Concern:

We, the undersigned, would like to ask the City to remove the parking on the south side of the street in the 600 block of Greever Terrace. We feel there is a safety issue as the west end of the block is reduced to a single lane of traffic and would not allow emergency vehicles access to several homes on that block.

Thank you for your consideration.
