CITY MANAGERS OFFICE
LAWRENCE, KS

Dear Mr. Corliss,

To better serve our customer, Lawrence Freenet, Inc. and to facilitate the installation of future infrastructure, Community Wireless Communications, Co. would like to enter into a franchise agreement with the City of Lawrence to provide Television and Data services.

The company has reviewed the City's existing agreements with other providers and is willing to enter into an agreement with the City of Lawrence on similar terms.

The only exceptions the company has to the existing agreement are:

Section 8: CWC is not planning on deploying an RF cable system. All television signals will be delivered using TCP/IP multicast streaming. Our initial choice of technology to deliver this service is MPEG4 video encoding, however, CWC would reserve the right to switch to other technologies as they become available, provided such changes do not unduly burden the company's subscribers.

To decipher TCP/IP multicast signals, subscribers who choose to use the service will require a set-top box. CWC will provide set top boxes for sale at the company's cost or lease these boxes to subscribers on reasonable terms.

Section 10: CWC is willing to provide a PIN as described in section 10 and Appendix A of the World Company franchise agreement dated May 3, 2005, provided that the other franchise holders do the same. Since other providers have been allowed to escape their obligations under this section, CWC would petition to have this section enforced on all franchise holders equally or have it stricken from the agreement.

The execution of this agreement should prevent future confusion as to the roll that CWC plays in the community. Though Lawrence Freenet, Inc. will continue to be a major customer, we are eager to begin serving businesses and families throughout the community with quality high speed video and data services.

Sincerely,

Joshua Montgomery
