RE: **Kasold (Trail to Peterson) mill and overlay restoration and landscaping – before and after**

As part of the 2011 pavement maintenance program Kasold (Trail to Peterson) received some major street maintenance. In addition to a standard asphalt mill and overlay we installed under drains, replace curbs as needed and improved the medians with exposed aggregate and landscaping. This section of Kasold was in much need of improvements.

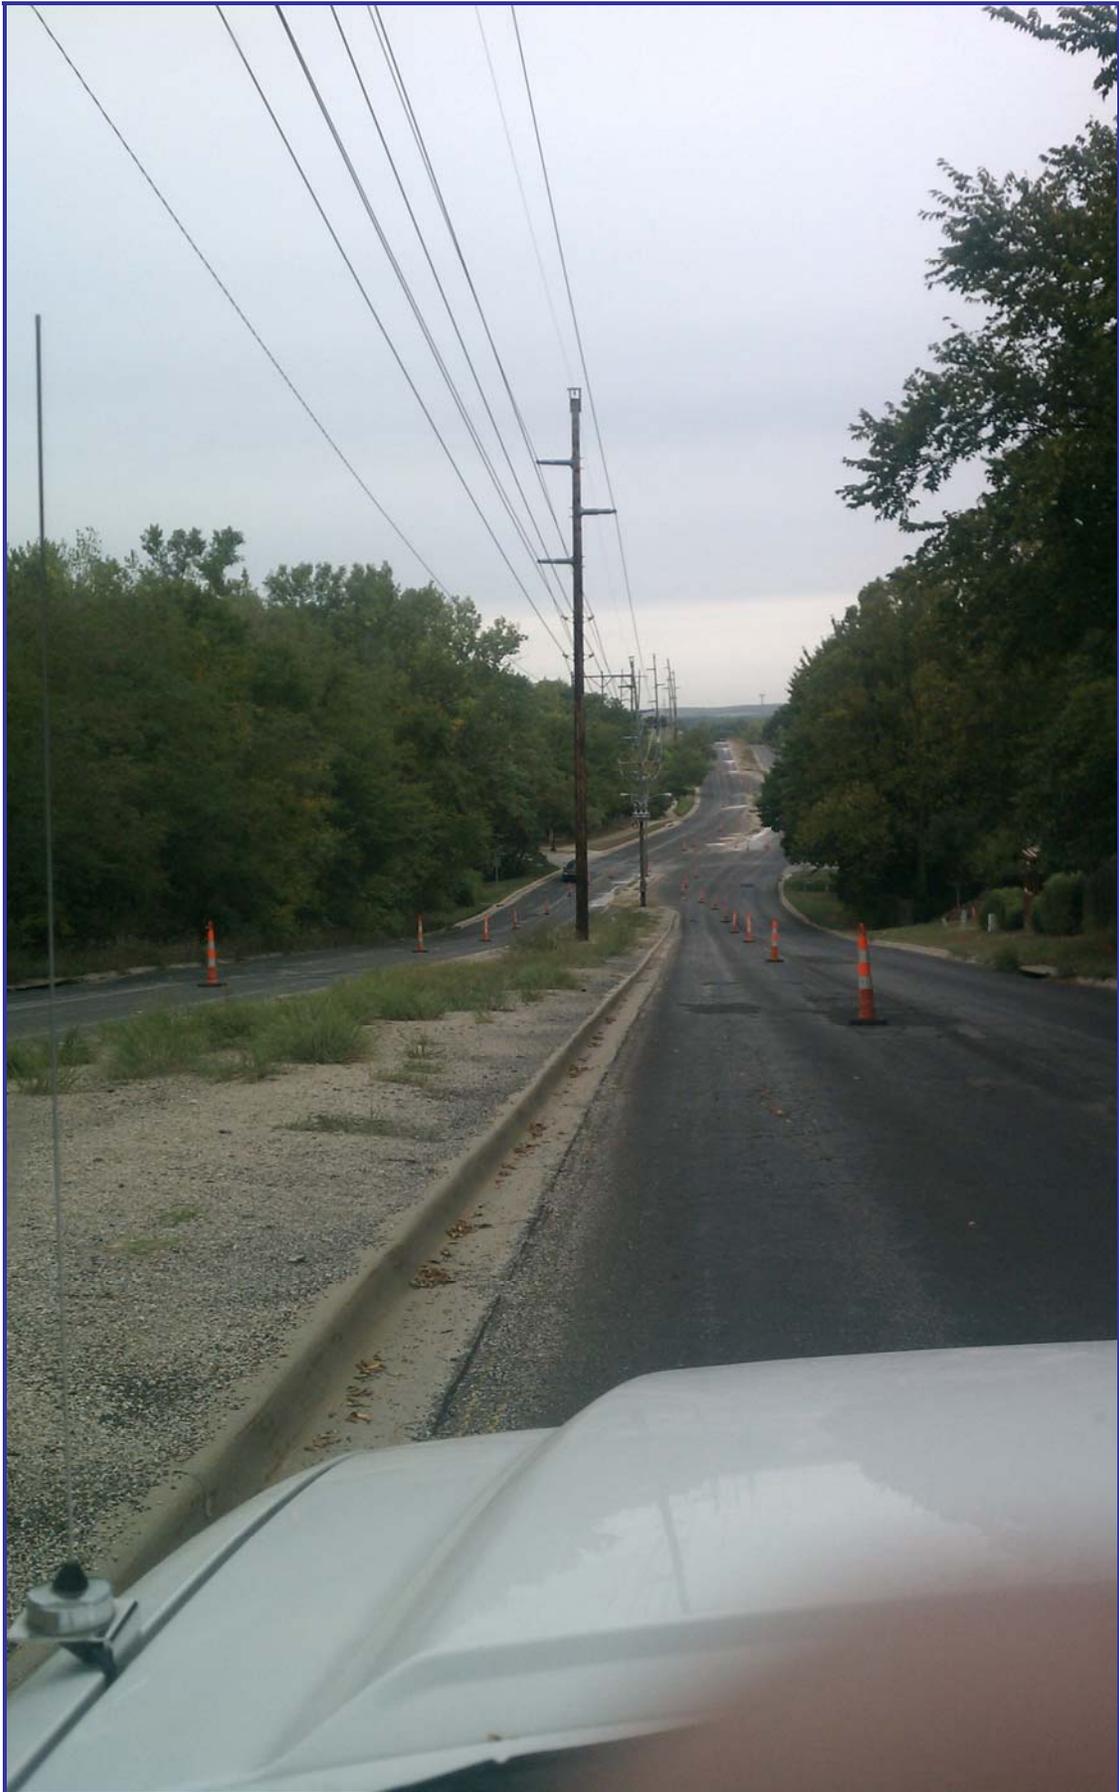

This joint project between Public Works and Park and Recreation departments produced a much improved road surface, while creating aesthetically pleasing medians with trees, grass and flower beds.

This project incorporated many of the complete street concepts as well.
