City Planning  
1 Riverfront Plz # 110  
Lawrence, KS 66044

Dear City Planners,

As we weighed the options for an acceptable surface for our new infant and toddler playground to be used with the daycare opening in our facility in a few weeks, the official board of Lawrence 360 Church (Clinton Parkway Assembly of God) would like to request of the city we be allowed to utilize artificial turf in this small space (15' x 56').

After much research we have found that the location of the play ground is very shaded, being on the north side of our facility (note attached drawing) and grass is very hard to maintain in this area. We have also found that artificial turf would keep our children clean and be one of the best outdoor playground surfaces to be free of allergens. We do not wish to sacrifice green space, but according to Health Department standards and the ease of maintaining the space we would need some sort of artificial surface and would like to use turf for all of its benefits.

Thank you so much for your consideration of our request.

Sincerely,

Jeremy Hahn (for the official Board)
