

ANOTHER PHASE OF DEVICTOR PARK TRAIL DEVELOPMENT COMPLETED

Recently, Lawrence Parks and Recreation Department staff completed the newest phase of the DeVictor Park trail (the dotted-red line on the map above). The phase included grading and installing ag lime on the trail, replacing a section of the trail that was previously a mowed-grass trail. At some point in the future, the section will be converted to concrete once sewer lines are established and additional housing is developed and completed in the area. The trail has developed as funding has allowed over the past five years. Plans to start the development of the trail down the east side of the park are hopeful for next year.
