Subject: bus relocation

Hi Diane Thank you so much for keeping us apprised of the bus situation, as far as we are concerned, as long as the busses are not idling in front of our store shaking the windows and filling the store up with fumes we are fine with the Vermont street hub. While I don't believe that this location addresses the needs of the bus drivers and patrons [restrooms, change, etc.] I hope that it will function efficiently as a temporary hub. thank you again for including us in these developments, we continue to be avid supporters of public transportation in Lawrence Sincerely
Cynthia Trask Blackbird Trading Post 8 W 9th Street

City Commissioners and City Manager,

Please find another location for the T buses transit hub. I am at Framewoods Gallery, 819 Massachusetts Street. Don't take away any more parking places close to our business on the west side of Massachusetts Street.

At 819 Massachusetts Street I have had 5 parking places already taken away. I have two handicapping parking places directly in front of my store and three handicapping places at the back of my store. Many of my customers have large items to carry after making a purchase, so parking closer to our store is important. Don't take away any more, even though they are not close.

If the planners who represent the city, would have thought ahead or worked together, maybe the handicap parking spaces would not have penalized just one business. Don't penalize us again.

How long will the temporary bus stop be located at the proposed site? I assume advertising and brochures will need to be printed to let the public know. Also when the construction at the library starts, more parking will be taken away, for who knows how long.

Please come up with another plan.

Thank you

Dave Seal
