Attn: Rhonda Birdsong

RE: KU/Lawrence Bus Facility (Revised)

Scope of Work:

Thank you for the opportunity to quote on the installation of a new CCTV system in the Bus Transit Facility.

We will provide and install the cameras shown on the floor plans provided, the security assessment and the walk thru.

We will also install all cabling and raceway required for all cameras.

The system is a complete IP based CCTV system that will communicate on the universities network. All cameras will be routed and stored in an NVR located at the Facility.

The major components for the entire system (all buildings) include the following:

Pelco DSSRV 180 18 TB NVR (1)
Pelco IM-10LW10-1 Interior IP Camera
Pelco IM-10LW10-1E Exterior IP Camera
Arecont AV8185DN 180 Degree IP Camera
CAT6A Cabling and Connectivity

I have included the installation of the appropriate cabling to each camera.

The amount does not include any 120VAC electrical power for the NVR.

A special mention needs to be made regarding the underground work at the site. It is understood that this was a fill site and may be full of rock. We believe that there is enough dirt cover to do our task, but in the event that an obstruction is found additional charges may apply.

Please feel free to call me if you should have any questions.

System Cost \$ 100,372.69
