**Subject:** DEVELOPEMENT PLAN FOR here @ KANSAS

Dear Sandra,

I am writing today to express my concern about the redevelopment of the Berkeley Flats apartments. I own the three structures directly south of this project. My main concern is that excavation so close to my 1134 Mississippi property will cause damage. When I built this place I back filled with gravel to aid in drainage. When they excavate I am afraid all the gravel is going to fall into their hole and I will lose support to the north wall of both my building and my parking bunker. I am not sure how to document the condition of my properties now and to have any damage caused by construction corrected by this development group. Any suggestions/guidance in this matter would be appreciated.

Sincerely

Jim Slough
