Hello-

Please see the below in regards to bicycle parking on or near the 1000 block of Massachusetts St.

Over the years the granada theater has had a limited amount of bike parking in front of our business. However, often it has not been enough parking for those who wish to travel on two wheels to events at our theater. We would support and promote a bike rack placed in a parking space close to our venue. Thank you to the city and the BAC for offering additional safe parking options for non-automobile transportation.

Subject: Additional Bike Parking near Red Lyon
Date: Monday, November 21, 2016 12:48:03 PM

Hello Jessica,

This is Chris Nerverve from the Red Lyon Tavern. I hope this isn't too late because I understand there is a meeting today to discuss additional downtown bicycle parking. We we would like to request the space directly in front of our building at 944 Massachusetts St. be considered for an additional bike area.

The intersection at 10th and Massachusetts is a popular area for many bars and restaurants such as ours who have numerous customers who use their bicycle as a their main mode of transportation throughout the year. Our block is lacking safe, legal spots to lock bikes that is in a well lit area. We have found that many people have been putting their bikes inside our entrance because of a lack of spots in the area where there is a direct, visible view of their bikes on Mass St.

Thank you for considering this area in the future as we recognize that more and more bicycle traffic is expected in the future as Lawrence grows our biking infrastructure.

-Chris Nerverve
