City of Lawrence

Planning & Development Services

TO: Thomas M. Markus, City Manager
 FROM: Barry Walthall, Building Codes Manager
 CC: Scott McCullough, Planning & Development Services Director
 Kurt Schroeder, Asst. Director, Development Services
 Date: November 13, 2018
 RE: October 2018 Monthly Permit Reports

The Building Safety Division issued 293 building permits in October, with total construction for the month valued at \$34,355,495. Total permit fees assessed for the month were \$225,339, and total review fees assessed were \$24,994. Permits were issued for 60 new residential projects, including 15 single-family dwellings, 25 duplexes and 20 multi-family dwellings with 336 dwelling units.

Comparison to the previous five (5) years for monthly and year-to-date statistics for number and valuation of new construction and city project building permits issued; total number and valuation for all building permits issued; and total building permit and plan review fees collected will be tracked throughout 2018 in the following table¹.

Permits Issued	2013	2014	2015	2016	2017	2018
New One- & Two-Family, October	7	12	30	25	14	40

¹ Values in the table for valuation and fees are rounded to nearest dollar.

In addition to tracking the above statistics, the chart below tracks and compares the numbers of permits issued year-to-date over the last 10 years, for new one- and two-family dwellings, new multi-family dwellings, new commercial buildings, and the total number of permits issued.

Permits were issued for 21 City projects in October, all for inflow and infiltration program projects by the Municipal Services and Operations Department at various locations with valuation totaling \$71,565.

The largest projects for the month were for construction of six (6) new multi-family dwellings and 25 duplexes for the Collegiate student housing project at 1601 W. 33rd Street, valued at \$14,259,598; 14 new multi-family dwellings at the Links of Lawrence Phase II, 5800 Rock Chalk Drive, valued at \$8,386,576; and an addition and renovations for Panda Pediatrics at 1803 W. 6th Street, valued at \$1,900,000.

These statistics are of interest in tracking construction activity in the community, but only partially tell the story for staff workload and performance. Staff has established performance goals of completing "initial" reviews for residential permits within five (5) business days and for commercial permits within 15 business days of the application date. An initial review is a comprehensive first review of an application and plans for a building project, and may include review work performed by staff from Planning and Development Services, Fire and Medical, Utilities and Public Works Departments, as well as other relevant review agencies (depending on the nature and scope of the project). Initial and subsequent reviews and comments are tracked in the Innoprise permit tracking system from which reports may be extracted. Development Services staff is responsible for coordinating review work and disseminating review comments to applicants.

During the 2017 calendar year, staff achieved these goals for 94.3% of all residential permits with an average review time of 2.7 days; and 85.9% of all commercial permits with an average review time of 7.9 days. For comparison, the following table provides data from 2014 (the first full calendar year for which data is available) as well as 2018 year-to-date performance.

Year	Residential %	Residential Average (# of Days)	Commercial %	Commercial Average (# of Days)
2018 (YTD)	95.0%	2.6	81.1%	9.0
2017	94.3%	2.7	85.9%	7.9
2016	96.5%	2.3	91.6%	7.3
2015	94.7%	2.6	88.8%	7.9
2014	95.5%	2.5	96.0%	6.2

In October, staff completed 138 of 141 residential reviews within five (5) business days (97.8%), and 110 of 132 commercial reviews within 15 business days (83.3%). The following table tracks performance in meeting these objectives.

	Residential Permits				Commercial Permits			
	Total Number of Reviews	Number of Reviews Completed within 5 Business Days	Average Review Time (Days)	Percent of Reviews Completed within 5 Business Days	Total Number of Reviews	Number of Reviews Completed within 15 Business Days	Average Review Time (Days)	Percent of Reviews Completed within 15 Business Days
