Re: New Construction of three one-story buildings containing 10 units of Supportive Housing
1000 W. 2nd St., Lawrence, KS 66044
Using HUD MTW reserve funds

Dear Danelle Waters,

Thank you for informing the Delaware Tribe regarding the above referenced project. Although we are unaware of any locations with cultural or religious significance within your project area, given the project's location it is our recommendation that you conduct an archaeological field survey that includes subsurface testing in archaeologically sensitive areas. After this survey is completed, we would appreciate a copy of the report so that we may reevaluate the project and its potential impact on archaeological and human remains.

Should this project inadvertently uncover an archaeological site and/or human remains, even after an archaeological survey, we request that the project activities be postponed until the appropriate state agencies and the Delaware Tribe are consulted. We appreciate your cooperation and should you have any questions, feel free to contact me by phone at (620) 340-0111 or e-mail at bobermeyer@delawaretribe.org.

Sincerely,

Brice Obermeyer
