Subject: I support the proposed bus hub location

To the City Commission:

In the context of the climate crisis, it is essential that Lawrence keep improving and expanding its transit system as rapidly as possible. A new hub at Crestline and Bob Billings will give the system a permanence that has been sorely lacking, and emphasize the city's commitment to sustainable transportation as well as its partnership with KU.

Additionally, relocating the hub away from the congested downtown area will improve parking and traffic in that area.

The proposed site seems to be an ideal location to develop this facility.

Thanks,
Natalya Lowther
