RE: East Ninth Design Development Update

Please find attached PDF package of drawings presented at the March 2, 2016 CAC meeting. For the sake of clarity, we did add the proposed crosswalk for the shared path and sidewalk at East 9th and Delaware on the south side of the street.

As stated during our last CAC meeting, el dorado is recommending the “shared path” scenario in the interest of maximizing green space and parking while preserving historic brick sidewalks and existing mature trees.

During the month of March, the design team will be working through the following remaining considerations for the “shared path” scenario:

- Art integration
- Landscaping integration
- Further parking analysis
- Stormwater management strategies
- Power pole locations/ relocations
- 3-D renderings of proposed design

We look forward to sharing our proposed Design Development Draft with the CAC later this month.

Thank you,

Josh Shelton
