Bicycle Friendly Community Application
Lawrence, KS
Spring 2012
The League of American Bicyclists has designated Lawrence, KS as a Bicycle Friendly Community at the Bronze level, because Lawrence exhibits a strong commitment to cycling that is still in its beginning stages. The reviewers felt that there is still “room to grow”, but that notable steps are being made in the right direction:

- **Engineering**: Lawrence recently implemented a policy to engineer streets with the consideration of bicyclists. Community and transportation planners, and civil engineers receive training in bicycle and pedestrian planning and engineering. The community has a bike parking ordinance for all new developments and an ordinance that allows bike parking to substitute for car parking. Lawrence uses road diets and area wide traffic calming to make roads safer for all road users. Most if not all natural surface trails and singletrack are open to bicyclists. Cyclists are accommodated at busy intersections through timed signals, loop detector markings and video detection.

- **Education**: Lawrence has recently educated motorist and bicyclists on sharing the road safely through public service announcements, community newsletters, bike ambassadors, dedicated bike page on the community website, blogs on cycling, social media, share the road signs and by including share the road information in driver’s education. Community requires safe driving training for transit operators.

- **Encouragement**: Lawrence promotes National Bike Month through a city proclamation, public service announcements, a Bike Month events guide, commuter breakfasts and a trail construction/maintenance day. The community celebrates cycling outside of Bike Month through community rides, public service announcements, trail construction/maintenance days and a commuter challenge. Lawrence has a mountain bike park and a velodrome.

- **Enforcement**: A police officer is an active member of the bicycle advisory committee. Officers have received specific training on the relationship between bicycling and law enforcement. There are specific penalties for failing to yield to a cyclist when turning and/or it is illegal to park or drive in a bike lane (intersections excepted). There are penalties for motor vehicle users that ‘door’ cyclists. There is a ban on texting while driving.

- **Evaluation & Planning**: Decent bicycle mode share (2%). Lawrence is currently updating its bicycle master plan.

Particular highlights were the Burroughs Creek Rail Trail; Bike Safety Month; helmet and bicycle giveaways; outreach to businesses during Bike Month; Historic Gravel Road Ride; Summit Tour of Lawrence; Lizard Under the Skillet Bike Ride; Solstice Ride; Octoginta Bike Ride; and the Thanksgiving Day Ride.

Reviewers were very pleased to see the current efforts, potential and commitment to make Lawrence a great place for bicyclists which can be seen in the growing number of cyclists. The BFC review team expects great things in the future given the good local team and the coming improvements to the network and programs.

Below, reviewers provided recommendations to further promote bicycling in Lawrence in the short and long term. Further increasing bicycle use can improve the environment by reducing the impact...
on residents of pollution and noise, limiting greenhouse gases, and improving the quality of public spaces; **Reduce congestion** by shifting short trips (the majority of trips in cities) out of cars. This will also make cities more accessible for public transport, walking, essential car travel, emergency services, and deliveries; **Save lives** by creating safer conditions for bicyclists and as a direct consequence improve the safety of all other road users. **Research shows** that increasing the number of bicyclists on the street improves bicycle safety; **Increase opportunities** for residents of all ages to participate socially and economically in the community, regardless of income or ability. Greater choice of travel modes also increases independence, especially among **seniors** and **children**; **Boost the economy** by creating a community that is an attractive destination for new residents, tourists and businesses; **Enhance recreational opportunities**, especially for children, and further contribute to the quality of life in the community; **Save city funds** by increasing the efficient use of public space, reducing the need for costly new road infrastructure, preventing crashes, improving the health of the community, and increasing the use of public transport; **Enhance public safety and security** by increasing the number of “eyes on the street” and providing more options for movement in the event of emergencies, natural disasters, and major public events; **Improve the health and well being** of the population by promoting routine physical activity.

The *key measures* Lawrence should take to improve cycling in the community are:

- Expanding the bicycle and pedestrian manager’s time focused on bike projects would help in scaling up your BFC efforts. Current work of the BPAC and TDM staff could be complemented by a staff person devoted to acquiring bike/ ped grants and making the community bicycle-friendly. See this report on the importance of Bicycle & Pedestrian program staff. [http://www.bikeleague.org/resources/reports/pdfs/why_bike_ped_staff_april_2010.pdf](http://www.bikeleague.org/resources/reports/pdfs/why_bike_ped_staff_april_2010.pdf)

- Continue to expand the bike network and increase network connectivity through the use of bike lanes, bike tracks, shared lane arrows, signed routes and bicycle cut-throughs. Since arterial and collector roads are the backbone of every transportation network, it is essential to increase the number of wide shoulders or [bike lanes](#) along these roads to allow bicyclists of all skill levels to reach their destinations quickly and safely. On-street improvements coupled with the expansion of the off-street system will continue to increase use and improve safety. These improvements will also increase the effectiveness of encouragement efforts by providing a broader range of facility choices for users of various abilities and comfort levels.

- Ensure that bicycle-safety education is a routine part of public education and that schools and the surrounding neighborhoods are particularly safe and convenient for biking. Work with your Bicycle Advisory Committee and local bicycle advocates to develop and implement [Safe Routes to School programs](#) that emphasizes bicycling for elementary schools, middle schools and high schools. Strongly encourage all schools to participate.
Offer bicycling skills classes, Traffic Skills 101 classes and commuter classes on a frequent basis or encourage a local bicycle advocacy group, club or shop to do so. Ideally the instruction would incorporate a classroom portion as well as on-road training. For examples of educational materials visit: http://www.bikeleague.org/programs/education/.

Encourage local businesses to promote cycling to the workplace and to seek recognition through the Bicycle Friendly Business program. Businesses will profit from a healthier, happier and more productive workforce while the community would potentially profit from some bicycle-active businesses as well: increasing the bicycle mode share, less commuter traffic, better air quality, public bike parking in prime locations provided by businesses, new and powerful partners in advocating for bike infrastructure and programs on the local, state and federal level, and public bike events, skills and maintenance classes hosted or sponsored by businesses. The city should be the model employer for the rest of the community.

Reviewers provided the following menu of recommendations to further promote bicycling:

**Engineering**

Low hanging fruit and fast results:

- Ensure that new and improved bicycle facilities conform to current best practices and guidelines – such as the NACTO Urban Bikeway Design Guide, AASHTO Guide for the Development of Bicycle Facilities and your DOT’s own guidelines. Consider innovative bicycle infrastructure such as bicycle tracks, contra-flow bike lanes or colorful bike lanes.

- Ensure that the standards for bike parking conform to APBP guidelines: http://www.apbp.org/resource/resmgr/publications/bicycle_parking_guidelines.pdf

- Consider hosting a Smart Cycling course for city staff to better understand cyclists’ needs, behavior, and their right to use city streets as well as multi-use paths for transportation. Your local bicycle advocacy group are a great resource for this kind of training.

- Ensure that all public busses are equipped with bike racks.

- Install way-finding signage at strategic locations around the community. Here are some best practices from the Washington, DC area Council of Governments: http://www.mwcog.org/uploads/committee-documents/t1dZW1k20070516090831.pdf

- Improve the coordination and communication between city departments and state paving and rehabilitation projects and facilities maintenance. Consider offering oversight to state DOT staff and contractors working within municipal boundaries. Ensure that facility design follows current best practice and that they are properly installed.
• Consider measuring the bicycle level of service (LOS) on community roads and at intersections, to be able to identify the most appropriate routes for inclusion in the community bicycle network, determine “weak links” in the network, prioritize sites needing improvement, and evaluate alternate treatments for improving bike-friendliness of a roadway or intersection: http://www.bikelib.org/bike-planning/bicycle-level-of-service/(roads) and http://www.bicyclinginfo.org/library/details.cfm?id=4425 (intersections).

• Accommodate bicycles at intersections and multi-use path crossings to improve efficiency and safety of all road and path users. At intersections, consider adding bike boxes to make bicyclists more visible to motorists. Consider incorporating raised multi-use path crossings or other high-visibility treatments on medium and high traffic roads. Ensure that both path and road users are clearly informed about who has the right-of-way at every crossing.

Long Term Goals:

• Increase the amount of secure bicycle parking at popular destinations such as transit stops, schools, recreation and entertainment facilities, retail and office clusters and churches throughout the community. More and more communities also ensure that multi-family residential developments provide secure and covered bike parking.

• Develop a system of bicycle boulevards that creates an attractive, convenient, and comfortable cycling environment welcoming to cyclists of all ages and skill levels. See more on how to do it at http://www.ibpi.usp.pdx.edu/guidebook.php

Education

Low hanging fruit and fast results:

• It is vital to make motorists and cyclists aware of their rights and responsibilities on the road. Continue to expand public education campaigns to promote the share the road message and the rights and responsibilities of all users, e.g. through public service announcements. Consider taking advantage of your local bicycle advocates for content and strategy development and manpower. See a motorist education video at http://www.bikelib.org/safety-education/motorists/driver-education/.

• Start a motorist ticket diversion program. Road users given citation are offered an opportunity to waive fees for violations by attending a bicycling education course. This should include a classroom and on-road component. See what Pima County has done: http://bikeped.pima.gov/Safety%20(pdfs)/April%20-%20May%202011%20Bicycle%20Diversion%20Class%20(No%20Locations).pdf

• Education on bicycling is not only important for bicyclists but for all road users - including motorists. Start a motorist education programs for professional drivers such as school bus
and taxi drivers in the city. See what San Francisco has done
http://www.sfbike.org/?drivertraining Classes can be offered by League Cycling Instructors or local bicycle advocates and material is available through the League of American Bicyclists.

- Team with a local advocacy group, bicycle shop, or League Cycling Instructor to offer regular public maintenance classes to residents at public parks, libraries, community centers and in conjunction with city events. A short tutorial on how to change a flat tire can empower a person to ride their bike more often.

**Encouragement**
Low hanging fruit and fast results:

- Expand encouragement efforts during National Bike Month in partnership with local bicycle advocacy groups. Host, sponsor and/or encourage bicycle-themed community events such as community rides, a bicycle festival or a commuter challenge. Ensure to widely advertise all bicycle-themed community events. You and the local bicycle community can increase your efforts on Bike to Work Day/Week, for example by offering breakfast for bike commuters or by having the mayor or council member lead a commuter convoy:
  http://www.bikeleague.org/programs/bikemonth/

- Promote, host, sponsor and/or encourage a variety of bicycle-themed, fun and family-friendly community events year-round, such as a bike movie festival, a 4th of July bike parade, a dress-like-Santa community ride before Christmas, a kids triathlon, a bicycle fashion show (fashionable alternatives to lycra), a Halloween bike decoration competition, a bike to the arts event, etc. Work closely with local bicycle advocacy groups, bike clubs, bike shops, bike teams and schools. Provide appropriate safety measures such as road closures or police escorts.

- Consider passing an ordinance or local code that would require larger employers to provide shower facilities and other end-of-trip amenities.

- Encourage local institutions of higher education to promote cycling and to seek recognition through the Bicycle Friendly University program. College and university campuses are unique environments for their high density, stimulating atmosphere and defined boundaries. These factors make them ideal environments to incorporate bikes. Many colleges and universities have built upon these good conditions and embraced the enthusiasm for more bicycle-friendly campuses by incorporating bike share programs, bike co-ops, clubs, bicycling education classes and policies to promote bicycling as a preferred means of transportation. The community could potentially profit as well: Communities near a BFU such as Stanford or University of California at Davis have a very high number of regular bicyclists (as many students bike to campus, shops and restaurants), less congestion around campus, safer streets and university-hosted public bicycle events, programs and
classes.” See what Stanford University is doing for cyclists:

- Set up and promote bicycle-themed community celebrations and/or rides each time the community completes a new bicycle related project. This is a great way to show off the city’s good efforts and introduces new users to the improvement.

- Consider offering a ‘Ciclovia’ or ‘Summer Streets’ type event, closing off a major corridor to auto traffic and offering the space to cyclists, pedestrians and group exercise events.
http://cicloviarecreativa.uniandes.edu.co/english/index.html

- Consider partnering with a local bicycle advocacy group or bike club to launch a bike buddy or bicyclist mentorship program for inexperienced riders. A bike mentorship program that teams experienced cyclists with newcomers is a great way to encourage and educate novice commuters. See what Spokane, Wash. and Charlotte, N.C. are doing
http://groups.google.com/group/bikementor,
http://www.spokanebicycleclub.org/bikebuddy.htm

- Consider creating a Bicycle Ambassador program like Chicago’s:
http://www.bicyclingambassadors.org/

- Develop a series of short (2-5 mi.) (themed) loop rides around the community and provide appropriate way-finding signage. Integrate these rides into local bike maps.

**Enforcement**
Low hanging fruit and fast results:

- Appoint a law-enforcement point person to interact with cyclists.

- Actively facilitate stronger connections between bicycle advocates, the wider bicycling community and law enforcement. Ask police officers to use targeted information and enforcement to encourage motorists and cyclists to share the road. This could be in the form of a brochure or tip card explaining each user’s rights and responsibilities. Have information material available in Spanish, if applicable. Also increase the number of police officers patrolling multi-use paths and streets on bike, as it gives officers a better understanding of the conditions for cyclists and keeps secluded multi-use paths safe.

- Enforcement practices could also include positive enforcement ticketing. Police officers could team up with local stores to reward safe cycling practices by handing out gift certificates to cyclists who are “caught” following the law. See what Tewksbury, MA is doing:
• Adopt fair, equitable and uniform traffic laws that are “vehicle-neutral” to the greatest extent possible. Local laws that discriminate against cyclists, or restrict their right to travel, or reduce their relative safety, should be repealed.

Evaluation/Planning
Low hanging fruit and fast results:

• Expand efforts to evaluate bicycle crash statistics and produce a specific plan to reduce the number of crashes in the community. Available tools include Intersection Magic: http://www.pdmagic.com/im/ and PBCAT. See the report Bicyclist Fatalities and Serious Injuries in New York City 1996-2005

• Consider implementing a trip reduction program/ordinance. See good examples at http://bikepeddocumentation.org/ and http://www.portlandonline.com/transportation/index.cfm?c=43801

Long Term Goals

• When updating your comprehensive bike plan, closely collaborate with the community to ensure public involvement, information and ownership. Focus on developing/completing a seamless cycling network that emphasizes and creates short distances between residential areas and popular destinations such as schools, commercial areas, recreational facilities, cultural resources and transit stops. Complement infrastructure planning with encouragement, education, and enforcement programs to increase usage. Develop a clear vision statement and set ambitious but attainable targets. The overarching goal should be to increase the percentage of trips made by bicycle in the community.

• Ensure that there is dedicated funding for the implementation of the bicycle master plan.

• Integrate the implementation of the bike plan into the master plan, all land use plans, zoning ordinances and larger development projects.

• Allow and encourage a mix of uses, a well-connected street network and compact development patterns throughout the community to shorten the distances people need to bike.

For more ideas and best practices please visit the Bicycle Friendly Community Resource Page.
