Subject: Request for disabled parking at 1909 Edgelea Road

Good afternoon my name is Brian Taylor

I am writing in correspondence to the disabled parking request at 1909 Edgelea Road

I'm a former resident of 1906 Edgelea Road, which is directly across from 1909 where the disabled parking is being requested, My wife and I and our daughter were very recent residences across the street and had took notice to the troublesome times that Miss Rockhold had accompanying her disabled daughter Sydnee to the bus each and every day and nearly always witnessing the bus have to be in different locations frequently, I have seen first hand how her child was confused on time's the bus would pick her up directly in front of the driveway and when there were other times she had to travel down the road. I believe in today's society there are things that we can do to help disabled childrens learning beginning with a reliable routine, and not as convenience for a parent as some people would see.

As a parent myself and a witness to this child's misunderstanding bus route, I would hope the City of Lawrence passes this ordinance, as a stepping stone for a child with an already learning disability that we all can do our part to help with any way we all can with her condition and a leap forward for her to begin with learning repeatability for going and returning from school.

Brian Taylor

Subject: Handicap parking 1909 Edgelea Rd

This is just a note to inform you that the residents at 1909 Edgelea Rd has a handicap child and handicap hang tags for that child. They are needing to be able to have parking in front of their home. There is only parking on one side of the road and others take that parking in front of their home which makes them having to park too far away for their child. If it were marked handicap parking there would be no more problems with the parking spaces. 2 spaces are being asked for so if some one else close also needs one. (But do have 2 vehicles they use to transport this child and work truck gets broken into if in street)

Subject: Charlea Rockhold handicap parking on street

I have known this family for many years. They have a child that is disabled and Charlea also has health issues requiring the use of handicap placards. They have multiple vehicles that are utilized including that of her grown daughter. It would be in their best interest to be allowed 2 handicap parking spaces in front of their home. There have been multiple breakins on the street mandating that Doug park his company work truck in the driveway and not on the street. This only leaves the street for Charlea to park. The neighbors tend to park in front of the house not allowing Charlea the spaces for her vehicles.

Thank you.
