Project # CM-21-0001

Project Name Record Management System

Type Equipment

Department City Manager's Office

Contact

Category Unassigned

Score NA

Useful Life

Description

A record management system is software that provides a centralized repository for all City records. The system is in the interest of efficiently using public resources to ensure that City records are retained only as long as is required to meet legal, financial, administrative, or historical needs.

Justification

The City does not have a record management system and many departments are working under separately established retention schedules and processes. The record management system will automatically apply the City's retention policies which eliminates manual effort and reduces the likelihood of human error in managing these records. This system is in the best interest of efficiently using public resources by reducing staff time spent managing documents and the cost associated with maintaining physical documents in offsite storage. The system securely destroys records when they are no longer legally required or necessary for business operations. Finding active files will be more efficient and sensitive data will be less vulnerable to theft and misuse. The ability to retrieve active documents in a timely manner ensures compliance with the Kansas Open Records Act and protects the rights of citizens.

Expenditures		2021	2022	2023	2024	2025	Total
Other		120,000					120,000
	Total	120,000					120,000

Project # HR-21-2101

Project Name Human Resources Information System (HRIS)

Type Equipment
Useful Life 10 years

Department City Manager's Office **Contact** City Manager

Category Unassigned

Score NA

Description

A human resource information system (HRIS), sometimes referred to as human resources management system (HRMS), is software that provides a centralized repository of employee master data that the human resource management (HRM) group needs for completing core human resource (HR) processes. HRIS package typically includes individual modules for payroll, applicant tracking, compensation management, time and attendance, employee lifecycle management, on-boarding, performance appraisals and management training. benefits administration, employee portals among other employee related topics.

Justification

The current payroll system lifecycle is projected to be complete in approximately 2022. Presently the Human Resources division uses a variety of software from a variety of companies along with spreadsheets for a pieced together HRIS system. Many do not interact with each other automatically requiring manual interfacing. A single system would create efficiencies with staff maintenance, staff record keeping and data extraction. It falls under the City's strategic goals of Effective Performance and Professional Administration, Sound Fiscal Stewardship and Collaborative Solutions.

Expenditures		2021	2022	2023	2024	2025	Total
Other		500,000					500,000
	Total	500,000					500,000
Funding Sources		2021	2022	2023	2024	2025	Total
Equipment Fund		500,000					500,000
	Total	500,000					500,000

Budget Impact/Other

The HRIS system would replace current software and spreadsheets. It will provide additional modules for programs that are currently manually maintained. This project will create greater organizational efficiencies, data maintenance and data extraction capabilities.

Project # FM-21-2010

Project Name Replacement Fire Medical Portable Radios

Type Equipment
Useful Life 10 years
Category Equipment

Score NA

Department Fire Medical **Contact** Fire Chief

Description

This project would replace the existing emergency portable radios carried by fire medical staff, and improve the standard of technology used for emergency communications. In turn, fire medical personnel will be able to communicate more effectively with other personnel, other City employees including police and MSO, and the hospital system during emergency events.

Portable radios provide two-way radio communication during emergency incidents and allow emergency personnel to effectively communicate with other resources locally and state-wide.

Justification

The current radio technology is outdated and has exceeded the ten-year electronics life expectancy. Once the radio exceeds this cycle, maintenance and technology challenges impact the reliability of performance of the radio.

The department saw an increase in radio maintenance costs with an overage from budget in 2019 by \$4,448.

Priority-Based Budgeting (PBB) program alignment from 2019 with this project include Fire Suppression (Q1), Emergency Medical Services (Q1), Employee Health, Safety, and Wellness (Q1), Domestic Preparedness (Q2), Technical Rescue (Q2), Hazardous Materials (Q2), and Tactical Medic (Q3).

Critical Success Factor Alignment: Commitment to Core Services; Safe, Healthy and Welcoming Neighborhoods, Innovative Infrastructure and Asset Management.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnis	nings	900,000					900,000
	Total	900,000					900,000
Funding Sources		2021	2022	2023	2024	2025	Total
Equipment Fund		900,000					900,000
	Total	900,000					900,000

Budget Impact/Other

Dougals County will be asked to provide assistance on the project. Portable radios are used by all sworn personnel for all service provisions.

Project # FM-21-2128

Project Name 647 Replacement Truck 5

Type Equipment
Useful Life 12 years
Category Equipment
Score NA

Department Fire Medical **Contact** Fire Chief

Description

Replace a 2009 Pierce Velocity fire apparatus (Truck 5) based on elevated maintenance and repair cost, decreasing reliability of service, and the age of the truck. The replacement would improve the standard of service to the entire City with a more reliable vehicle.

Truck 5 is the only aerial platform fire apparatus in the Lawrence-Douglas County Fire Medical Fleet. The aerial platform provides for safer elevated operations for personnel and rescue victims

Justification

Truck 5 has the highest maintenance and repair cost in the fire apparatus fleet; \$75,714.19 more over the past 4 years compared to any other apparatus. Over the past fours years, Truck 5 has cost \$208,733.77 in maintenance and repairs, averaging \$52,183.44 per year.

Eighteen work orders were submitted in 2019 resulting in 1,403.4 hours out of service. Truck 5 was not in service 58.4 days accumulatively in 2019.

The replacement will include new technology to improve safety for firefighters and enhance the standard of service to the City of Lawrence with improved reliability.

Priority-Based Budgeting (PBB) program alignment from 2019 with this project include Fire Suppression (Q1), Emergency Medical Services (Q1), Employee Health, Safety, and Wellness (Q1), Domestic Preparedness (Q2), Technical Rescue (Q2), Hazardous Materials (Q2), and Tactical Medic (Q3).

Critical Success Factor Alignment: Commitment to Core Services; Safe, Healthy and Welcoming Neighborhoods, Innovative Infrastructure and Asset Management.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnishings		1,500,000					1,500,000
	Total	1,500,000					1,500,000
Funding Sources		2021	2022	2023	2024	2025	Total
Equipment Fund		1,500,000					1,500,000
	Total	1,500,000					1,500,000

Budget Impact/Other

Budget Items		2021	2022	2023	2024	2025	Total
Maintenance		-25,000					-25,000
	Total	-25,000					-25,000

Project # FM-22-1812

Project Name Quint for New Fire Medical Station Number 6

Type Equipment
Useful Life 12 years
Category Equipment

Score NA

Department Fire Medical **Contact** Fire Chief

Description

When fire medical station six is service ready, a Quint fire apparatus (combination ladder and engine) will need to be purchased for assignment to this station.

Justification

The departments reserve fleet is not able to absorb the expansion of becoming a front line apparatus based on current maintenance and out of service rates. Quints and medic units (ambulances) work together in concert providing greater flexibility and efficiency of fire and medical services to the citizens of Lawrence.

The fire medical department's response times have continued to elongate, now consistently two minutes slower than the departments benchmark for two consecutive years. As the community continues to evolve, the department needs to adapt to ensure it can provide reliable emergency services. Areas of the City, including the northwestern portion of are not capable of receiving benchmark response time based on existing resources.

Recognizing an operational ready fire station takes several years, the department is requesting approval to purchase land suitable for a new fire station in 2021, planning and design costs in 2022, and station construction costs in 2023. The department is collaborating with City GIS and other City staff to publish a station optimization report by the end of 2020. This report will identify considerations to improve response time performance and reliability.

In 2018, the department was reaccredited, but received strategic recommendations relating to response time performance and resource capabilities. See additional information in the attached memoranda and the 2018 Commission on Fire Accreditation International (CFAI) Report and its strategic recommendation for response performance time improvement.

Priority-Based Budgeting (PBB) program alignment from 2019 with this project include Fire Suppression (Q1), Emergency Medical Services (Q1), Employee Health, Safety, and Wellness (Q1), Domestic Preparedness (Q2), Technical Rescue (Q2), Hazardous Materials (Q2), and Tactical Medic (Q3).

Critical Success Factor Alignment: Commitment to Core Services; Safe, Healthy and Welcoming Neighborhoods, Innovative Infrastructure and Asset Management.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnishings			1,650,000				1,650,000
	Total		1,650,000				1,650,000
Funding Sources		2021	2022	2023	2024	2025	Total
Equipment Fund			1,650,000				1,650,000
	Total		1,650,000				1,650,000

Budget Impact/Other

Annual maintenance costs will increase, with increased expense as the apparatus ages. Current apparatus of this type range from \$2,000 in the first few years, up to \$40,000 per year after eight years in service.

2021 thru 2025

City of Lawrence, Kansas

Budget Items	2021	2022	2023	2024	2025	Total
Maintenance				2,000		2,000
,	Total			2,000		2,000

Project # FM-22-2009

Project Name Replacement Fire Medical Mobile Radios

Type Equipment
Useful Life 10 years
Category Equipment

Score NA

Department Fire Medical **Contact** Fire Chief

Description

Replace 100 Single-band mobile radios.

Mobile radios provide two-way radio communication during emergency incidents and allow emergency personnel to effectively communicate with other resources locally and state-wide.

This project would replace the existing existing mobile emergency radios used by fire medical staff, and improve the standard of technology used for emergency communications. In turn, fire medical personnel will be able to communicate more effectively with other personnel, other City employees including police and MSO, and the hospital system during emergency events.

Mobile radios provide two-way radio communication during emergency incidents and allow emergency personnel to effectively communicate with other resources locally and state-wide.

Equipment Fund			600,000				600,000
	Total		600,000				600,000

Budget Impact/Other

Douglas County will be asked to provide financial assistance for the project.

Project # FM-22-2126

Project Name 634 Replacement Investigation Unit 1

Type Equipment
Useful Life 15 years
Category Equipment
Score NA

Department Fire Medical **Contact** Fire Chief

Description

Replace a 2006 Pierce/Medtech GMC 4500 (Investigation Unit) for fire medical investigations.

Fire investigators respond to fires and use investigation equipment stored on the vehicle. Investigators also use the vehicle to conduct inverviews of witnesses and complete reports during their investigation.

Justification

The investigation truck is needing to be replaced with newer technology to assist in collecting fire incident information, and provided an improved space to conduct witness interviews.

Priority-Based Budgeting (PBB) program alignment from 2019 with this project include Fire Suppression (Q1) and Fire Investigations (Q3).

Expenditures		2021	2022	2023	2024	2025	Total

Cost reduced by trade in value - TBD

Project # FM-22-2250

Project Name 643 Replacement Quint 50

Type Equipment
Useful Life 12 years
Category Vehicles
Score NA

Department Fire Medical **Contact** Fire Chief

Description

Replace a 2009 Pierce Velocity fire apparatus (Quint 50) based on elevated maintenance and repair cost, decreasing reliability of service, and the age of the truck. The replacement would improve the standard of service to the entire City with a more reliable vehicle.

Justification

Replacement based on City vehicle replacement program based on increasing maintenance and repair costs. In the year 2023, this fire apparatus will be 13 years old. Based on historical probability, cost will increase, and unit reliability will continue to decline.

Over the past four years the maintenance and repair costs for this firetruck have been \$102,270.99. The replacement would decrease those costs and increase the reliability of the unit to imrpove service quality to the community.

Priority-Based Budgeting (PBB) program alignment from 2019 with this project include Fire Suppression (Q1), Emergency Medical Services (Q1), Employee Health, Safety, and Wellness (Q1), Domestic Preparedness (Q2), Technical Rescue (Q2), Hazardous Materials (Q2), and Tactical Medic (Q3).

Critical Success Factor Alignment: Commitment to Core Services; Safe, Healthy and Welcoming Neighborhoods, Innovative Infrastructure and Asset Management.

Budget Impact/Other

Project # FM-23-2433

Project Name 648 Replacement Engine 4

Type Equipment
Useful Life 12 years
Category Equipment
Score NA

Department Fire Medical **Contact** Fire Chief

Description

Replacement of a 2012 Pierce Velocity fire apparatus based on elevated maintenance and repair cost, decreasing reliability of service, and the age of the truck. The replacement would improve the standard of service to the entire City with a more reliable vehicle.

Engine 4 is multipurpose fire appratus with additional equipment and technlogy for hazardous materials incident response.

Justification

Replacement based on City vehicle replacement program based on increasing maintenance and repair costs. In the year 2023, this fire apparatus will be 11 years old. Based on historical probability, cost increases, and unit reliability will continue to decline.

Over the past four years the maintenance and repair costs for this firetruck have been \$106.478.11 The replacement would decrease those costs and increase the reliability of the unit to imrpove service quality to the community.

Priority-Based Budgeting (PBB) program alignment from 2019 with this project include Fire Suppression (Q1), Emergency Medical Services (Q1), Employee Health, Safety, and Wellness (Q1), Domestic Preparedness (Q2), Technical Rescue (Q2), Hazardous Materials (Q2), and Tactical Medic (Q3).

Critical Success Factor Alignment: Commitment to Core Services; Safe, Healthy and Welcoming Neighborhoods, Innovative Infrastructure and Asset Management.

Project # FM-24-2230

Project Name 646 Replacement Engine 10

Type Equipment
Useful Life 12 years
Category Equipment
Score NA

Department Fire Medical **Contact** Fire Chief

Description

Replacement of a 2010 Pierce Velocity fire apparatus (Enigine 10) based on elevated maintenance and repair cost, decreasing reliability of service, and the age of the truck. The replacement would improve the standard of service to the entire City with a more reliable vehicle.

Justification

Replacement based on increasing maintenance and repair costs. In the year 2024, this fire apparatus will be 14 years old. Based on historical probability, cost will continue to rise, and unit reliability will continue to decline.

Over the past four years the maintenance and repair costs for this firetruck have been \$104,096.94. The replacement would decrease those costs and increase the reliability of the unit to improve service quality to the community.

Priority-Based Budgeting (PBB) program alignment from 2019 with this project include Fire Suppression (Q1), Emergency Medical Services (Q1), Employee Health, Safety, and Wellness (Q1), Domestic Preparedness (Q2), Technical Rescue (Q2), Hazardous Materials (Q2), and Tactical Medic (Q3).

Critical Success Factor Alignment: Commitment to Core Services; Safe, Healthy and Welcoming Neighborhoods, Innovative Infrastructure and Asset Management.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnish	nings				950,000		950,000
	Total				950,000		950,000

Total					1,500,000		1,500,000

Budget Impact/Other

Project # FM-25-2501

Project Name Self-Contained Breathing Apparatus Replacement

Type Equipment
Useful Life 10 years
Category Unassigned

Score NA

Department Fire Medical **Contact** Fire Chief

Description

This project replaces all Self Contained Breathing Apparatus (SCBA) for fire medical personnel. The SCBA are often reffered to as "air-packs". Firefighters wear this personal protective equipment to protect their airway, allowing them to breathe clean air while working in different dangerous environments, such as inside a building with smoke and fire.

Justification

The departments Self-Contained Breathing Apparatus (SCBA) need to be replaced due to aging working components and performance enhancing technology becoming available.

The department strives to comply with industry standards as much as possible including the National Fire Protection Association (NFPA)1500 Standard for Fire Department Occupational Health, Safety, and Wellness, along with the NFPA 1852 Standard on Selection, Care, and Maintenance of Open-Circuit Self-Contained Breathing Apparatus. The current SCBA equipment was purchased in 2015 and will reach a tenyear life in 2025. SCBA maintenance costs are increasing and will continue based on historical trends.

This purchace would enhance firefighter safety with new innovative breathing systems and improve services provided to the community. Firefighting and rescue tasks can be delayed based on poor visibility in smoke-filled environments. The time to firefighting task completion should improve with the new SCBA masks which can integrate hands-free thermal imaging technology.

Priority-Based Budgeting (PBB) program alignment from 2019 with this project include Fire Suppression (Q1), Employee Health, Safety, and Wellness (Q1), Domestic Preparedness (Q2), Technical Rescue (Q2), and Hazardous Materials (Q2).

Critical Success Factor Alignment: Commitment to Core Services; Safe, Healthy and Welcoming Neighborhoods, Innovative Infrastructure and Asset Management.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnish	nings					1,000,000	1,000,000
	Total					1,000,000	1,000,000
Funding Sources		2021	2022	2023	2024	2025	Total
Equipment Fund						1,000,000	1,000,000
	Total					1,000,000	1,000,000

Budget Impact/Other

Potential saving for trade in value of older SCBA packs.

Douglas County will be asked to provide financial assistance on the project.

2021 thru 2025

City of Lawrence, Kansas

Project # FM-25-2502

Project Name Fire Medical Body Camera Program

Type Equipment
Useful Life 10 years
Category Unassigned

Score NA

Department Fire Medical
Contact Fire Chief

Description

This body camera system would be worn by fire medical presonnel to capture audio and video information from calls and training events. This video information would be stored in a secure location, similar to that of the police body cameras.

The system allows firefighters to capture video of their care being provided, and gather information for quality control related to standards of care and treatment and medical protocol compliance.

Justification

The fire medical department provides emergency response to the community and can be challenged on the interactions, and or services it provides. The camera system would be able to be used to validate quality services provided by the department and allow for more visual, evidence-based information.

The department relies solely on the the reports in the departments record management system to provide as legal information, when defending the department and City of allegations. This video data would provide a higher quality measure of additional media to support the quality of service provided to the community.

Priority-Based Budgeting (PBB) program alignment from 2019 with this project include Fire Suppression (Q1), Emergency Medical Services (Q1), Employee Health, Safety, and Wellness (Q1), Domestic Preparedness (Q2), Technical Rescue (Q2), Hazardous Materials (Q2), and Tactical Medic (Q3).

Critical Success Factor Alignment: Commitment to Core Services; Safe, Healthy and Welcoming Neighborhoods, Innovative Infrastructure and Asset Management.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnishings						500,000	500,000
	Total					500,000	500,000

Equipment Fund						500,000	500,000
	Total					500,000	500,000

Budget Impact/Other

Douglas County will be asked to provide financial assistance on the project.

2021 thru 2025

City of Lawrence, Kansas

Project # IT-21-FIBER

Project Name Annual Fiber Projects

Type Equipment

Department Information Technology

Contact

Category Unassigned
Score NA

Useful Life

Description

These funds allow the City to continue to maintain the City's significant fiber infrastructure, and to take advantage of network improvements by working with our public agency partners such as Douglas County, Kansas University, Lawrence Memorial Hospital, Lawrence Public Library, Haskell Indian Nations University and others fiber companies.

Justification

The City's fiber infrastructure is the backbone of the City's network and provides connectivity to City buildings, traffic signals, water towers and other critical city assets, and is also used to provide the City's Internet connectivity. The funds in this CIP request are used to implement fiber opportunities in connecting City Infrastructure, for fiber repairs and maintenance of the City's existing fiber network. These funds also allow the City to take advantage of fiber project collaboration opportunities with our public agency partners, and communication and fiber companies.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnishings		150,000					150,000
	Total	150,000					150,000
Funding Sources		2021	2022	2023	2024	2025	Total
Equipment Fund		150,000					150,000
	Total	150,000					150,000

Budget Impact/Other

The City's fiber not only allows the City to operate on a high-speed network, but offers significant savings over costs of third-party high-speed network connectivity costs from other vendors. The fiber network allows for each location and asset to share a single network connection and does not require the City to pay the high monthly costs charged by communication companies.

2021 thru 2025

City of Lawrence, Kansas

Project # IT-21-VMWare

Project Name VMWare Hardware Refresh

Type Equipment
Useful Life 4 years

Department Information Technology

Contact

Category Unassigned

Score

Description

This project provides for the scheduled replacement of the seven VMware virtualized server hosts that support the majority of the City's servers supported by Information Technology. Virtualization does away with the inefficiency of the old one server, one application model, in which most servers are vastly underutilized. Virtualization enables one single server to function as multiple virtual machines, with each virtual machine able to operate in different environments. Replacing these servers on a four-year schedule allows the City to maintain the City's server infrastructure in a stable environment.

Justification

The City has used VMware for many years to virtualize fifty-three (53) servers to run on seven (7) VMware server hosts. Each of the VMware servers have the ability to support and average of eight servers, offering significant costs savings, while offering the high-availability features such as Image-based backups and restores and other disaster recovery features that come with VMware. Another feature of VMware allows our system administrators to move a running virtual machine from one host to another with no downtime.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnishings		120,000					120,000
	Total	120,000					120,000
Funding Sources		2021	2022	2023	2024	2025	Total
Equipment Fund		120,000					120,000
	Total	120,000					120,000

Budget Impact/Other

Supporting the VMware server refresh helps Information Technology to provide high-availability servers that require less operating expense since the physical space required for the comparable physical servers would exceed the load recommendations of the floor under the server room, and the air conditioning load and electricity expenses would be three to four times our current operating costs.

This project will have no impact on the operational budget, Information Technology maintains the integrity of the City's VMware servers by having them on a four-year replacement schedule.

Project # MS-22-F003

Project Name 438 Hook Lift Replacment

Type Equipment
Useful Life 10 years
Category Vehicles
Score NA

Department MSO - Solid Waste **Contact** PW Director

Description

Scheduled replacement of unit 438. Small hook type container trucks provide multi use containers and compactor services for commercial services related to solid waste operations. This type of unit has a life expectancy of 7 to 10-years.

Justification

Hook Lift trucks provide the front line source of service for comercial operations

Project # PR-21-9002

Project Name Equipment Replacement - Chipper Truck

Type Equipment
Useful Life 15 years
Category Vehicles
Score NA

Department Parks and Recreation **Contact** PR Director

Description

Replace aging Chipper truck that was originally purchased in 1999. The existing chipper truck pulls a wood chipper and holds wood chips collected as part of the debris clean-up at forestry job sites when pruning and removing trees.

To improve operational efficiency, it is recommended this unit be replaced with a grapple truck. This truck will allow green waste to be collected and hauled to the recycling lot for processing in the larger tub grinder. Recycled green debris are then used as landscape mulch in the City's parks and landscape areas.

Justification

Maintain existing fleet

Project # FM-21-1903

Project Name Public Safety Mobile Command Vehicle

Type Equipment
Useful Life 10 years
Category Equipment

Score NA

Department Police **Contact** Fire Chief

Description

The Lawrence Police Department and Lawrence-Douglas County Fire Medical Department have identified a need to purchase a Public Safety Mobile Command Vehicle to be shared by both departments for large Fire Medical incidents, (fires, hazmat and special events) and Police incidents (crisis events, special events).

Both departments currently utilize Douglas County's 2005, Freightliner Mobile Command Vehicle that is managed by Douglas County Emergency Management and housed at the Douglas County Public Works Department. Requests for use of the vehicle are sent through Douglas County Emergency Management.

The Douglas County Mobile Command Vehicle is not constructed or equipped to facilitate the needs of our departments. The Mobile Command Vehicle is designed into two sections, a rehab area and a small communications area. Technological and command working space requirements have exceeded the capabilities of the current vehicle. The vehicle allows for an area to get members out of the weather, it is not equipped properly as a Command Post for Law Enforcement or Fire Medical incidents. Douglas County Emergency Management reports they do not have plans for a replacement of this vehicle.

Justification

When there is an incident that requires a Command Post presence close to the incident, a Public Safety Mobile Command Vehicle will allow for real time decision making, and face to face communications with Command Staff and front line supervisors working in the field.

Law Enforcement needs the ability to see live video feeds, as well as a conference style layout. Ever changing tactics and technology as well as public expectations of critical incidents is requiring more and more emergency responder collaboration.

Fire Medical needs the ability to assemble Command Staff with technological capabilities to facilitate on scene incident action planning, resource management, and accountability for the incident.

A Public Safety Mobile Command Vehicle is a location for on scene Commanders, and Supervisors to manage and safely mitigate incidents. Both departments have specific job functions and responsibilities that routinely requires improved on scene decision making capabilities through a Unified Command structure. Often other city department supervisors (streets, utilities) are needed to assist during these events. This vehicle will give us the ability to put the on scene decisionmakers of the incident in a single location close to the incident, increasing our abilities for the best possible outcome of the incident.

By collaborating on this project, and sharing the resources between departments, it will be a cost savings to the city. More importantly we will have a forward Command Post at major incidents for department Command Staff to manage the incidents.

This project requires purchasing a purpose built mobile command vehicle for the Police Department and Fire Medical Department. We would utilize Pierce Manufacturing Inc. for the procurement of this vehicle. There is already a well-established relationship with the Fire Medical Department and Pierce Manufacturing, Inc. The vehicle will be purchased utilizing the Houston Galveston Area Council cooperative purchasing program. Pierce Manufacturing, Inc. products have proven to be reliable and their customer service is extremely responsive.

Expenditures		2021	2022	2023	2024	2025	Total

Project # PD-21-0001

Project Name Annual Police Vehicle Replacement

Type Equipment
Useful Life 7 years

Department Police

Contact Police Chief

Category Vehicles
Score NA

Description

This is an ongoing yearly expense to keep the fleet of police patrol and administrative vehicles serviceable. Every Year the Department needs to replace up to ten marked patrol vehicles due to age and mileage. In conjunction with that the administrative vehicles that command staff, detectives and other critical support services drive also need replacement.

In 2020 The Commission authorized the replacement of fourteen vehicles. In 2021 the department is also asking for fourteen vehicles to be replaced. Currently we are changing our administrative and patrol supervisor fleet over to the Dodge Durango from the Ford Explorer. The vehicle has been cheaper while providing the same level of service.

Justification

This is a critical function of the police department that requires yearly updating. The Patrol vehicles are utilized by officers to respond to calls for service in the community in a safe, efficient and timely manner. The administrative vehicles are utilized by other members of the department to also respond to calls for service or conduct follow up investigations. These vehicles routinely leave the city for investigative purposes and must be road worthy.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnishings		465,000					465,000
	Total	465,000					465,000

Description

Purchase and implementation of a department Records Management System (RMS) to be utilized in the creation, maintenance, and dissemination of police reports to our agency and community partners. The RMS system would also house all police report records and information obtained during the

Justification

In 2013 the police department, along with the Emergency Communication Center (ECC), and the Douglas County Sheriff's Office (DGSO) purchased and later implemented a shared RMS system, Spillman Technologies. This system was utilized by the ECC for Dispatch functions and had been used by the DGSO for their jail functions prior to our involvement. Before the Spillman RMS system the Police Department had used in house personnel to code and maintain the local RMS system. This is no longer an option with current staff.

Since the time of implementation, the Police Department has struggled to meet the needs and expectations of our agency partners such as the Douglas County District Attorney's Office and the municipal court prosecutor's office. The RMS system produced and maintained by Spillman Inc. has not been able to meet our reporting requirements to the state of Kansas to date. Additionally, there was a steady decline in service to the system after the company was purchased by the Motorola corporation.

In order to successfully meet the reporting needs of the public, the state of Kansas, and our partnering agencies the Police Department needs to purchase and implement a stable and effective RMS system.

Expenditures		2021	2022	2023	2024	2025	Total
Other			800,000				800,000
	Total800,000					800,000	
Funding Sources		2021	2022	2023	2024	2025	Total
Equipment Fund			800,000				800,000
	Total		800,000				800,000

Budget Impact/Other

After the initial purchase cost there is an anticipated yearly maintenance agreement that would begin and replace the current Spillman maintenance agreement costs which are budgeted \$38,114.20

2021 thru 2025

City of Lawrence, Kansas

Project # PD-23-0001

Project Name Annual Police Vehicle Replacement

Type Equipment
Useful Life 7 years

Department Police **Contact** Police Chief

Category Vehicles
Score NA

Description

This is an ongoing yearly expense to keep the fleet of police patrol and administrative vehicles serviceable. Every Year the Department needs to replace up to ten marked patrol vehicles due to age and mileage. In conjunction with that the administrative vehicles that command staff, detectives and other critical support services drive also need replacement.

Justification

This is a critical function of the police department that requires yearly updating. The Patrol vehicles are utilized by officers to respond to calls for service in the community in a safe, efficient and timely manner. The administrative vehicles are utilized by other members of the department to also respond to calls for service or conduct follow up investigations. These vehicles routinely leave the city for investigative purposes and must be road worthy.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnishings				510,000

Total		510,000				510,000	

Budget Impact/Other

There is an anticipated cost of \$510,000 for this project. This is a 3% increase from 2022.

2021 thru 2025

City of Lawrence, Kansas

Project # PD-23-0003

Project Name Critital Response Negotiation Vehicle

Type Equipment
Useful Life 15 years

Department Police

Contact Police Chief

Category Vehicles
Score NA

Description

This is a purpose built vehicle designed for use during critical incidents where negotiators are deployed. During critical incidents with barricaded subjects, suicidal subjects or other people experiencing some form of breakdown it is imperative to establish and maintain a line of communication to try and resolve the incident peacefully with no harm to the person or officers. This vehicle give the negotiators a workspace to establish and maintain an uninterrupted line of communication. Outside influences and interruptions often cause a breakdown in that critical line of communication.

Justification

This allows the department negotiators to a specific built portable workspace to respond to critical incident where negotiation is a critical function. Currently there is no such platform. Negotiators currently often work in less than ideal situations utilizing whatever equipment or vehicles they can borrow. This vehicle will allow the department's negotiators to have all of their equipment housed in one vehicle for quick response to any critical incident within the city.

Project # TR-21-03

Project Name Transit Vehicles

Type Equipment Useful Life 12 years

Department Public Transit

Contact

Category Vehicles
Score NA

Description

Transit Vehicles that are used in the delivery of public transit service. These buses will be fully accessible under ADA and will be equipped with bicycle racks.

Anticipated Funding: State Grants: \$500,000 Federal Grants: \$3,756,000 Local Funding: \$1,734,000

Justification

These buses will replace older buses that are expected to have accumulated high mileage. High mileage causes for high expense in upkeep. Higher mileage vehicles are often less dependable and result in numerous service failures. These failures result in passengers not being able to reach their destination to places such as work and doctor appointments.

Expenditures		2021	2022	2023	2024	2025	Total
Equip/Vehicles/Furnishings		5,990,000					5,990,000
