PROGRAM TOPICS

Kansas Wildlife and their Habitats

Marvel at the array of Kansas wildlife that live in our prairies, woodlands, and wetlands.

Surviving the Wild

Learn about the diverse adaptations of animals that allow them to survive the wild.

The Color of Nature

Explore the kaleidoscope of our natural world and discover the fascinating ways that animals use colors to help them survive.

Creepy, Crawly Critters

Explore the world of insects, spiders, scorpions, and other creepy crawlies.

Nature's Recyclers

Investigate the critical role of decomposers and scavengers in returning nutrients to the food chain.

Flowers and Pollinators

Explore the complex relationships between flowers and pollinators that insure the survival of plants.

Creatures of the Night

Learn about the mysteries of the natural world after dark.

Energy in Nature

Discover how plants harness energy from the sun to fuel our living world. Learn how energy moves through ecosystems in a food web.

On the Brink- Species in Danger

Learn the importance of wildlife conservation and how you can help protect the animals of our world.

Slimy, Scaly, Furry & Feathery- Let's Classify!

Get an up-close look at the world of animals with backbones!

Life in the Forest

Explore the woodland ecosystems of Kansas by investigating the structure, flora, and fauna of Kansas woodlands.

Prairies-Seas of Grass

Students will explore the concept of an ecosystem while focusing on the unique qualities of the Kansas tallgrass prairie, including its plants and animals.

Wetland Wonders

Be fascinated by our complex wetland ecosystems and the critters that inhabit them.

Reptiles & Amphibians

Learn to appreciate the unique qualities and adaptations of many frogs, toads, turtles and snakes!

Marvelous Mammals

Learn what makes mammals unique by investigating adaptations like their fur, claws, teeth, and more.

The World of Birds

Bird is the word in this program that explores the meaning of bird songs, how birds build nests, and many other fascinating adaptations and behaviors.
