

Transit and Pedestrian Accessibility Study Information and Comment Card

This study will evaluate the fixed-route transit system (all Lawrence Transit and KU routes that are part of the coordinated transit system) and pedestrian accessibility to/from the bus stop locations. The study will identify:

- ✓ Obstacles transit riders face in accessing the fixed-route system.
- ✓ Locations where improvements to the pedestrian environment can be made to improve and/or enable people to access fixed-route transit services.
- ✓ Issues with streets/sidewalks that prevent people from accessing the fixed-route system and force them to rely on paratransit.
- ✓ Possible locations for bus turnouts that could make the bus boarding and exiting process more convenient and enhance traffic operations.

Please take a moment to answer the following questions related to fixed-route transit and pedestrian access to bus stops within the Lawrence area. Your input will help the project team better understand your mobility needs and will help identify potential pedestrian and transit improvements.

the Transit and Pedestrian Accessibility Study...**

Questions on back side

- 1. What would you consider to be the biggest obstacles in accessing fixed-route transit within the Lawrence area? For example, you could comment on specific physical obstacles or general policies or other issues.**

- 2. What would you consider to be the most important variables that the project team should consider when prioritizing locations for pedestrian improvements?**

- 3. Is there any specific bus stop locations that you feel the project team should take a closer look at? Please try to be as specific as possible in describing the issues/concerns at each location.**

Thank you for your input! Please return your completed form to one of the project team members. Or, email your comments to Todd Girdler (tgirdler@lawrenceks.org) or Jim Meyer (jim.meyer@urs.com).
