

MPO Response: January 24, 2020

Thank you for your comments. The TIP programs locally selected regionally significant projects. We will share your comments with the City of Lawrence's Municipal Services and Operations (MSO) department. [We provided contacts for the appropriate people in MSO depending on if Mr. Baltuska wanted the intersection addressed through restriping or a larger project.]

Date Received: January 23, 2020

Good afternoon, Ashley,

I was just flipping through the latest TIP document, and was curious if there are any projects in the works for improving pedestrian safety at the crosswalk at Kentucky crossing 6th Street?

I noticed there had recently been some repainting of the left turn lane line for vehicle traffic, but the zebra stripes and stop line of the crosswalk are basically nonexistent at this point. I use this crosswalk at least twice daily, and I can say with confidence that this intersection is extremely dangerous to cross by bike or by foot.

I would love to see a project happen there to improve safety, and slow down vehicle traffic.

Thanks for your time,
Damon Baltuska
