Absolutely not will I ever edit this new detour or stop the job of emergency crews to get the bad roads fixed and repair is way overdue to the roads we haven't used due to the new trafficking venues and not having money to keep up with flow and proportions. I'm sure the old roads would live to get open again and have new fresh materials of synthetic to last and provide nature a better cheap way since the media is gone now that Brea and Ed's bodies were found from the 2 missing at railroad crossing fingers all that are missing and a toe.
