

### Solar Photovoltaic Permitting, Plan Review & Inspections:

This 10 Module (subjects) course is based on the *2017 National Electrical Code (NEC)*, *2018 International Residential Code (IRC)*, and *2018 International Fire Code (IFC)*. It provides an overview that teaches practical application of requirements specific to the intake of photovoltaic (PV) permit applications, plan review, and inspections. This course is helpful for permit technicians, plans examiners, building inspectors, code officials, electricians, and installers to better understand the key requirements for Solar photovoltaic PV systems. This course is geared toward residential PV systems; however, does discuss some components of commercial PV systems. Each Module consists of slide presentations with explanations and examples. This course is designed to be 6-hours in length.

### Instructor:

**Jason Lady, CFPS** serves as the Deputy Code Official for the City of Lawrence, Kansas. He also serves as the electrical plans examiner and building inspector. His previous experience includes time as the Lead Building Inspector for Lawrence, KS as the Building Inspector Specialist and 23 years as a firefighter, with 7 years specializing in plan review. He has more than 28 years in building and fire safety with more than 16 total years of experience in plan review. His ICC certifications include Building Plans Examiner and Commercial Building Inspector. He specializes in the requirements of the electrical code and review of solar photovoltaic systems.
