

THIS AREA IS SHOWN ON MAP NUMBER 20045C0082

LEGEND

To obtain more detailed information in areas where Base Flood Elevations (BFEs) and floodways have been determined, users are encouraged to contact the Flood Profiles and Floodway Data Tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on this FIRM represent rounded whole-foot elevations and therefore may not exactly reflect the flood elevation data presented in the FIS. For construction and/or floodplain management purposes, users are encouraged to use the flood elevation data presented in the FIS in conjunction with the data shown on this FIRM.

Elevation Reference Marks (ERM) elevations listed on this map were obtained and/or developed to establish vertical control for determination of flood elevations and floodplain boundaries portrayed on the map. Users should be aware that these ERM elevations may have changed since the publication of this map. To obtain up-to-date elevation information on National Geodetic Survey (NGS) ERM's shown on this map, please contact the Information Services Branch of the NGS at (301) 713-2042 or visit their website at www.ngs.noaa.gov. Map users should seek verification of non-NGS ERM monument elevations when using those elevations for construction or floodplain management purposes.

Coastal BFEs shown on this map apply only to areas of 0' National Geodetic Vertical Datum (NGVD). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations table in the Flood Insurance Study report for this community. Elevations shown in the Summary of Stillwater Elevations table should be used for construction, and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

- SPECIAL FLOOD HAZARD AREAS INUNDED BY 100-YEAR FLOODS:**
 - ZONE A:** No base flood elevations determined.
 - ZONE AE:** Base flood elevations determined.
 - ZONE AH:** Flood depths of 1 to 3 feet (usually areas of ponding); base flood elevations determined.
 - ZONE AO:** Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
 - ZONE A99:** To be protected from 100-year flood by Federal flood protection system under construction; no base flood elevations determined.
 - ZONE V:** Coastal flood with velocity hazard (wave action); no base flood elevations determined.
 - ZONE VE:** Coastal flood with velocity hazard (wave action); base flood elevations determined.
- FLOODWAY AREAS IN ZONE AE:** Floodway boundaries shown.
- OTHER FLOOD AREAS:**
 - ZONE X:** Areas of 500-year flood; areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood.
 - OTHER AREAS:** Areas determined to be outside 500-year floodplain.
 - ZONE D:** Areas in which flood hazards are undetermined.
- UNDEVELOPED COASTAL BARRIERS:**
 - Identified 1983
 - Identified 1998
 - Other/Not Protected Areas

(Coastal barrier areas are normally located within or adjacent to special flood hazard areas.)

- Floodplain Boundary
- Floodway Boundary
- Zone D Boundary
- Boundary Dividing Special Flood Hazard Zones, and Boundary Dividing Area of Different Coastal Base Flood Elevations Within Special Flood Hazard Zones
- Base Flood Elevation Line: Elevation in Feet*
- Cross Section Line (EL 987) Base Flood Elevation in Feet Where Uniform Within Zone*
- RM 7_x Elevation Reference Mark
- RM 1.5 River Mile

*Referenced to the North American Vertical Datum of 1988.

NOTES

This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all pluvial features outside Special Flood Hazard Areas. The community map repository should be consulted for more detailed data on BFEs, and for any information on floodway delineations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, A1-A3, A9, A99, V, VE, and V1-V10.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1/32 inch.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

For community map revision history prior to countywide mapping, see section 6.0 of the Flood Insurance Study Report.

For adjoining panels, see separately Printed Map Index.

MAP REPOSITORY

Refer to Repository Listing on Index Map

EFFECTIVE DATE OF COUNTYWIDE FLOOD INSURANCE RATE MAP: NOVEMBER 7, 2001

EFFECTIVE DATE(S) OF REVISION(S) TO THIS PANEL:

Refer to the FLOOD INSURANCE RATE MAP EFFECTIVE DATE shown on this map to determine when actual rates apply to structures in the zones where evaluations or depths have been established.

To determine if flood insurance is available, contact an insurance agent or call the National Flood Insurance Program at (800) 638-6620.
