## MODIFICATION INSPECTION CHECKLIST

### GENERAL
1. The M.I. is an on-site visual and hands-on inspection of structural modifications adding a new form of construction, and shall be performed by the Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is required to be performed by an Engineer of Record. The M.I. is requires...
