Mr. Jeff Crick, AICP  
Planning Director  
Department of Planning and Development, City of Lawrence  
1 Riverfront Plaza, Ste 320  
Lawrence, KS  66044

Request for Planning Director Waiver, 1843 Massachusetts Street

Dear Mr. Crick,

Hoke Ley is working with a local small business to open a craft coffee drive-through business housed in an Airstream trailer. The goal is to create low impact drive-through locations throughout the City of Lawrence, using existing urban infill sites instead of developing suburban green field sites. This philosophy is directly aligned with the vision of Plan 2040 and the comprehensive plan for the City of Lawrence. The first property under consideration is located at 1843 Massachusetts Street, in the parking lot of the existing car lot which was formerly a gas station built in 1955.

The business operations will be housed in a 16’ Airstream Bambi trailer that has been custom made for beverage service from which non-alcoholic beverages and pre-packaged baked goods will be sold. The trailer will be parked under the existing gas station canopy facing Massachusetts street, with a drive-through lane entering from 19th street and exiting onto Massachusetts street. The drive-through lane will be marked by temporary parking bollards. There will not be customer seating areas or service areas within the coffee trailer or on the site. The operating hours will be 7am – 5pm daily and may extend to 8pm on weekends during the summer. Utilities for the trailer will be self-contained except for power, which will be provided from the existing building. There will be no change to the use of the physical modifications to the existing building or site, as the coffee shop will not have any business operations inside the building. While the trailer will be operational while parked at the site during regular business hours, the mobile component of the trailer will allow the business to attend special events and food truck festivals.

The property is zoned CS with drive-through food service allowed. The existing site is fully developed based on previous zoning code requirements. Our proposal demonstrates that the intent of the code is fulfilled without redeveloping the site and our project otherwise meets sound site planning principles, per section 20-1305(b)(3)(v)(a). However, it is not possible to bring this site plan into full compliance within today’s current code requirements.

As you are aware, the Lawrence Development Code was written for new construction projects and does not offer consideration for existing infill properties which offer a lower impact, more sustainable development approach. Given this proposal’s spirit of urban renewal and the alignment of the vision of Plan 2040, we are requesting a Planning Director Waiver for the following parking requirements:
1. **Stacking drive-through lanes location:** PD Waiver requested to allow the stacking lanes within the front yard setbacks. The site can accommodate 4 stacking drive-through lanes as required by section 20-904, but they are partially located within the front yard setbacks. As this is an existing site, it is not possible to locate the stacking fully within the setbacks.

2. **Maintain the existing non-conforming parking spots:** PD Waiver requested to maintain the existing non-conforming parking spots located on the site plan dated July 27, 2020. Two conforming parking spaces shall be added to the site plan to serve the coffee employees per the attached site plan proposal.

3. **Traffic Impact Study Waiver:** PD Waiver requested to forego the TIS. The site was originally planned and used as a gas station which generates a high volume of traffic. The proposed addition of the small coffee trailer with drive-through service does not anticipate increasing the traffic volume beyond the original use for the property. The intersection at 19th and Massachusetts Streets is currently a lighted intersection with dedicated turning lanes and pedestrian circulation devices. Additional traffic control devices or improvements would not be feasible to a project of this scale and the additional expense of performing a TIS is a financial burden to a small business.

We believe that this type of development meets the goals of the City of Lawrence Planning Department and supports the vision of Plan 2040 to create urban infill development opportunities for small businesses. We request these waivers due to the site-specific conditions of the property. We look forward to your response.

Sincerely,

Katie Hoke, NCIDQ
