

Date

Downtown Transit Station site selection, step 1 of 3: Do you suggest changes to the draft boundary?

Purpose of this survey: Current Downtown transit transfers lack safe, comfortable, and operationally efficient infrastructure. The first step to select a site for Downtown transit improvements is to define a boundary. Once approved, only sites within the selected Downtown Station boundary will be considered. The City is asking for the public’s input on suggested revisions to the draft boundary.

What’s next:

- A final recommended boundary will be reviewed and voted on by the Downtown Transit Station Steering Committee in May 2024 and voted on by the City Commission in June 2024.
- Step 2 includes developing criteria to evaluate sites (Apr 2024 - Aug 2024).
- Step 3 includes soliciting site ideas, then evaluating them against the criteria and choosing a final site for design and construction (Jun 2024 - Dec 2024)
